2002 Fresh Market Vegetable Production Estimated at 457 Million Hundredweight

Fresh market vegetable and melon production for the 24 selected crops estimated in 2002 totaled 457 million hundredweight. Harvested area covered 1.93 million acres. Value of the 2002 crop was estimated at 9.28 billion dollars. The three largest crops in terms of production were head lettuce, onions, and watermelon, which combined to account for 38 percent of the total production. Head lettuce, tomatoes, and onions claimed the highest value, accounting for 36 percent of the total value when combined.

For the 24 selected vegetables and melons estimated in 2002, California continued to be the leading fresh market State, accounting for 42 percent of the harvested area, 48 percent of production, and 47 percent of the value.

Vegetable Program Changes

For the 2002 crop year, many changes occurred to the National Vegetable Estimation Program. Ten fresh market commodities and two processing commodities were removed from the program. Additionally, States were removed from the program for certain commodities. When comparing 2000 and 2001 data to 2002 data, comparable States should be used as noted in the table footnotes. If you need assistance with these comparisons, please contact Biz Wallingsford at (202) 720-2157. For details on the 2002 program changes see the following website: <http://www.usda.gov/nass/events/programchg/vegprogchns.htm>.

Leading Fresh Market Vegetable States in 2002

Rank	Area Harvested		Production		Value	
	State	Percent of Total	State	Percent of Total	State	Percent of Total
1	CA	42.3	CA	47.6	CA	47.0
2	FL	9.6	FL	9.5	AZ	13.1
3	AZ	6.3	AZ	8.1	FL	12.6
4	GA	6.2	GA	4.6	TX	4.2
5	TX	4.8	TX	4.5	GA	3.4

¹ Only includes estimates for the selected crops in the NASS annual program. These crops are not estimated for all States that might produce them. See the 1997 Census of Agriculture for a comprehensive tally of total vegetable acres by State.

² Includes Hawaii.

³ Commodity estimates for 2000 and 2001 are comparable. Estimates for 2002 are not comparable due to vegetable estimation program changes. These changes are documented in footnotes found under each individual commodity table.

⁴ Includes processing total for dual usage crops.

⁵ Estimates discontinued in 2002.

34 Vegetables and Melons ⁶	21,741,110	21,423,830	20,712,140
Strawberries ⁴	862,770	749,470	893,660

¹ Only includes estimates for the selected crops in the NASS annual program. These crops are not estimated for all States that might produce them. See the 1997 Census of Agriculture for a comprehensive tally of total vegetable acres by State.

² Includes Hawaii.

³ Commodity estimates for 2000 and 2001 are comparable. Estimates for 2002 are not comparable due to vegetable estimation program changes. These changes are documented in footnotes found under each individual commodity table.

⁴ Includes processing total for dual usage crops.

⁵ Estimates discontinued in 2002.

⁶ Totals may not add due to rounding.

2002 Processing Production of 8 Selected Vegetables Estimated at 17.1 Million Tons

Processing production of 8 selected vegetables estimated in 2002 totaled 17.1 million tons. Area harvested is estimated at 1.35 million acres. Processing crop value is estimated at 1.35 billion dollars. The three largest crops in terms of production are tomatoes, sweet corn, and snap beans, which combine to account for 91 percent of the 8 processing crops estimated in 2002. The three most valuable of the 8 processed vegetables estimated in 2002 are tomatoes, sweet corn, and cucumbers, accounting for 79 percent of the total value when combined. California leads the nation with 24 percent of the harvested acreage, 66 percent of the production, and 50 percent of the value.

Vegetable Program Changes

For the 2002 crop year, many changes occurred to the National Vegetable Estimation Program. Ten fresh market commodities and two processing commodities were removed from the program. Additionally, States were removed from the program for certain commodities. When comparing 2000 and 2001 data to 2002 data, comparable States should be used as noted in the table footnotes. If you need assistance with these comparisons, please contact Biz Wallingsford at (202) 720-2157. For details on the 2002 program changes see the following website: <http://www.usda.gov/nass/events/programchg/vegprogchngs.htm>.

Leading Processing Vegetable States in 2002 ¹

¹ Estimates discontinued in 2002.

Definition of Terms

Hundredweight (cwt.) is the unit used for fresh market yield and production and is equal to one hundred pounds.

Prices are a marketing year average for all methods of sale. For a crop sold for both fresh market and processing, the **Marketing Year Average Price (MYA)** is a weighted average of the fresh and processing price.

Prices for fresh vegetables are the average prices producers receive at the point of first sale. This is commonly referred to as the **average price as sold**. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the vegetables are sold F.O.B. packed by growers, part are sold as bulk vegetables at the packinghouse door, and some are sold retail at roadside stands, the fresh vegetable **average price as sold** is a weighted average of the average price for each method of sale.

F.O.B. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the F.O.B. price. These costs include grading, packing, inspecting fees, selling, and other costs.

Prices for vegetables sold for processing are equivalent returns for vegetables delivered to the processing plant door.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops which are on a calendar year.

State Value of Utilized Production and MYA Price Computations

The following procedure is used to compute State Values of Utilized Production and MYA Prices:

Fresh Market Value of Production:

(Fresh Market MYA) *Times* (Fresh Market Production)

Processing Value of Production:

(Processing MYA) *Times* (Processing Production)

"All" Value of Production:

(Fresh Market Value of Production) *Plus* (Processing Value of Production)

"All" MYA:

("All" Value of Production) *Divided By* ("All" Production)

U.S. MYA Price Computations

The following procedure is used to compute the U.S. MYA Prices:

Fresh Market MYA:

(Fresh Market Value of Production for All States) *Divided By* (Fresh Market Production for All States)

Processing MYA:

(Processing Value of Production For All States) *Divided By* (Processing Production For All States)

"All" Sales MYA:

(Total Value of Production for All States) *Divided By* (Total Production for All States)

WEIGHTS and MEASURES

The following table on weights, measures, and conversion factors covers the vegetables in this report. It does not cover all containers for any one product.

The information has been assembled from State schedules of legal weights, various sources within the U.S. Department of Agriculture, and other Government agencies. For many vegetables, there is a considerable variation in weight per unit of volume due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

<u>Commodity</u>	Approximate net weight	
	U.S. Pounds	Metric Kilograms

2-layer flat	21	9.5
Watermelons:		
Melons of average or medium size	25	11.3

The "Vegetables 2003 Summary" report will be released in January 2004.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C., 20250-9410, or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: <http://www.usda.gov/nass/>. Select "Today's Reports" or Publications and then Reports Calendar or Publications and then Search, by Title or Subject.

E-MAIL SUBSCRIPTION

All NASS reports are available by subscription free of charge direct to your e-mail address. Starting with the NASS Home Page at <http://www.usda.gov/nass/>, click on **Publications**, then click on the **Subscribe by E-mail** button which takes you to the page describing e-mail delivery of reports. Finally, click on **Go to the Subscription Page** and follow the instructions.

AUTOFAX ACCESS

NASSFax service is available for some reports from your fax machine. Please call 202-720-2000, using the handset attached to your fax. Respond to the voice prompts. Document 0411 is a list of available reports.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-605-6220 FAX: 703-605-6900
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

Shifting consumer Preferences
Ensuring Food Safety
Impact of El Nino**

Sharpen your strategic focus at USDA's 79th annual Agricultural Outlook Forum. Note experts, industry leaders and producers will discuss many facets of competing in domestic and world markets.

The program will examine growing competition from Central and Eastern Europe, Brazil and Asia, as well as progress in WTO negotiations.

Focus sessions will highlight many challenges producers face in the competitive arena, ranging from the growing complexity and cost of regulation, to dealing with food safety and changing eating habits.

As always, leading analysts will be on hand to debate planting, trade and price prospects for farm commodities for the year ahead. Attendees will receive new 10-year commodity projections from USDA.

Networking opportunities abound at the Forum, which attracted 1,400 attendees last February. Register now for the best value. See full details at www.usda.gov/oce.
