The acid casein price range moved higher on the bottom this week, while the tops of the ranges for both acid and rennet casein moved lower. Contacts report acid casein production is strong in Oceania, contributing to increased spot availability. In Oceania, acid casein demand is strengthening, but stakeholders say interest from purchasers in other regions is unchanged from last week. Demand for rennet casein is softening in Europe. Spot purchasers say loads of rennet casein are easy to obtain. European milk output is light, which has limited rennet casein production in the region.
