LIVESTOCK and POULTRY INVENTORY, JANUARY 1

Release:
February 13, 1967
12:00 Noon (E. S. T.)

NUMBER, VALUE, and CLASSES

On January 1, 1967 there were 108.5 million cattle and calves on farms and ranches, a slightly smaller number than the revised level of 108.9 million head a year earlier and the second year of decline, according to the Crop Reporting Board. An increase of 1 percent in beef cattle was more than offset by the 5 percent decrease in dairy cattle. The number of cows and heifers 2 years old and older kept for milk decreased 5 percent to 15.2 million head -- the smallest number since 1893. The inventory of hogs and pigs on farms January 1 was 51.0 million head, an increase of 8 percent. All sheep and lambs totaled 23.7 million head, 4 percent below the revised level of a year earlier, and the smallest inventory since records began in 1867. The number of stock sheep and lambs declined 4 percent while the sheep and lambs on feed was down 6 percent. The number of chickens on farms increased 9 percent to 427.6 million head on January 1, 1967 while the number of turkeys increased 6 percent to 7.3 million head.

NUMBERS ON FARMS AND RANCHES JANUARY 1
UNITED STATES

Class of livestock and poultry 1/	Average 1961-65	1965	1966	1967	1967 as % of 1966
	1,000 head	1,000 head	1,000 head	1,000 head	Percent
Cattle	103,892	109,000	108,862	108,491	100
Cows 2 yrs. + for milk 2/	18,248	16,981	15,987	15,201	95
Hogs	55,544	50,792	47,414	51,035	108
All sheep	29,023	25,127	24,734	23,727	96
Stock sheep 3/	25,092	21,843	21,456	20,658	96
Chickens	379,086	394,118	393,019	427,619	109
Turkeys	6,380	6,100	6,905	7,340	106

1/ For more specific description see headings of tables by States. 2/ Included in cattle. 3/ Included in all sheep.

The Crop Reporting Board of the Statistical Reporting Service makes this report on numbers and value of livestock and poultry on farms (including ranches) as of January 1 for the United States, from reports furnished direct by livestock and poultry producers, reports collected with the assistance of the Post Office Department through the rural mail carriers and data assembled by field statisticians and cooperating State agencies. Livestock and poultry NOT on farms are excluded.

J. A. Baker

ACTING SECRETARY OF AGRICULTURE

ANNUAL LIVESTOCK AND POULTRY INVENTORY-JANUARY 1, 1967

(Continued from page 1)

The total value of livestock and poultry on the Nation's farms and ranches January 1, 1967 was **$18.9 billion, an increase of 7 per**cent from the $17.6 billion a year earlier. Meat animals (cattle, hogs and sheep) accounted for $18.3 billion of the current total. Meat animals on hand a year earlier were valued at $17.1 billion. The current inventory value of cattle and calves was $16.2 billion, **up 12 percent from** the level reached on January 1, 1966. Hogs and pigs contributed $1.7 billion to the livestock and poultry inventory value. Lower hog prices more than offset gains in numbers for a 20 percent decrease in total values from the 17 year high reached January 1, 1966. The value of all sheep, at $469.6 million, was down 4 percent. The poultry inventory value consisted of $511.8 million for chickens and $36.4 million for turkeys compared with $474.9 million and $36.3 million, respectively, a year earlier.

The January 1, 1967 index of livestock and poultry numbers on farms and ranches in the United States was 111 percent of the 1957-59 average, the same as a year earlier. The index of meat animal numbers on farms (cattle, hogs and sheep), was also 111 percent, the same as a year earlier. The index of milk cattle (milk cows plus heifers and calves kept for milk), at 72 percent, was down 3 points from the year earlier level. The current index of poultry numbers is 113 percent, up 9 points from a year earlier.

CATTLE: The January 1, 1967 inventory of all cattle and calves on farms in the Nation totaled 108,491,000 head, down less than one percent from the 108,862,000 head on farms a year earlier. This is the second year of decrease after reaching a record of 109 million head for January 1, 1965. Dairy stock continued the downward trend started in 1954.

The number of cattle and calves on hand was below a year earlier in 31 States, while 16 States had more cattle and 3 States showed no change. Numbers in Colorado increased 5 percent, the largest increase in any State while the sharpest reduction was 8 percent in Delaware.

Revisions in Estimates: The January 1 inventory estimates for 1961-65 have been revised on the basis of data obtained from the Census of Agriculture taken in the fall of 1964 and other data which have become available since the original estimates were made. Revised estimates by States for the years 1961-65 are shown in Statistical Bulletin No. 389 "Livestock and Poultry Inventory, January 1." This bulletin is available on request.

The revision for January 1, 1965 reflect the changes made over the 5-year period. The changes from the original 1965 estimates are as follows: all cattle up 2 percent, cows 2 years old and over kept for milk down 3 percent, other cows up 4 percent, stock sheep down 6 percent, hogs and pigs down 4 percent, chickens up 5 percent, and turkeys down 5 percent.

Regionally, the North Atlantic and the East North Central were each down 3 percent and the South Atlantic was down 1 percent. The West North Central showed very little change from a year earlier. There were increases of about 1 percent in both the South Central and Western regions.

Imports of live cattle from Canada and Mexico totaled 1,099,911 head during 1966 compared with 1,128,278 head in 1965.

The number of milk cows and heifers 2 years old and older, at 15,201,000 head, was down 5 percent from January 1, 1966. This is the lowest number since 1893 and marks the 13th consecutive yearly decrease. Dairy replacement heifers 1 to 2 years old totaled 3,619,000, down 6 percent from a year earlier. Heifer calves kept for milk cow replacements decreased 2 percent to 4,059,000 head.

The number of other cattle (all cattle except milk cows and dairy replacement heifers) increased 1 percent during 1966. The inventory of cows and heifers 2 years old and over, other than those being kept for milk, increased slightly to 34,592,000 head. The number of other heifers 1 to 2 years of age was 9,162,000 head, 3 percent above last year. Steers one year old and over totaled 12,733,000 head, down slightly from the 12,749,000 on hand at the beginning of 1966. Other calves increased a little over 1 percent to 27,262,000 head. Bulls 1 year old and over totaled 1,863,000, down 1 percent. This 1967 cattle inventory includes 11,279,000 head on feed for slaughter market in the 39 feeding States, 7 percent above a year earlier. The number on feed in Western States was up 4 percent while the number on feed in the Corn Belt States was up 7 percent.

The total value of cattle and calves on farms and ranches January 1, 1967, was a record $16,151 million, 12 percent more than a year earlier. A higher average value per head, at $149, more than offset the small reduction in inventory numbers. The average value per head for January 1, 1966 was $133. The value of milk cows and heifers 2 years old and older totaled $3,761 million on January 1, 1967, up 13 percent. The average value per head for milk cows was $247 compared with $208 a year earlier.

HOGS: The number of all hogs and pigs on farms and ranches in the United States on January 1, 1967 totaled 51,035,000 head, 8 percent more than the 47,414,000 head on hand a year earlier, but 8 percent less than the average.

Inventory numbers of hogs increased from a year earlier in all regions with the South Central region showing the largest increase at 15 percent. Other regions increased numbers as follows: South Atlantic, 11 percent, West, 9 percent; West North Central, 7 percent; and the East North Central and the North Atlantic regions, each 6 percent. Iowa, the leading hog producing State, had 8 percent more hogs on hand January 1 compared with a year earlier.

The total value of hogs on farms January 1, 1967 was $1,720 million, 20 percent less than the January 1, 1966 value of $2,144 million. The decline in total value resulted in a sharp decline in the value per head which more than offset the increased numbers. The January 1, 1967 average value per head, at $33.70, compares with the record $45.20 a year earlier.

SHEEP: The January 1, 1967 number of stock sheep on farms and ranches was 20,658,000 head, a decline of 4 percent from a year earlier and the smallest number since records were started in 1867. Sheep and lambs on feed January 1, 1967 for slaughter in the 26 principal sheep feeding States totaled 3,069,000 head -- a decrease of 6 percent from January 1 a year earlier. Stock sheep plus sheep and lambs on feed totaled 23,727,000 head, a reduction of 4 percent from the 24,734,000 head a year earlier.

Stock sheep inventories for all classes were lower than a year earlier. Ewes 1 year old and older totaled 16,223,000 head, 4 percent below the 1966 level of 16,850,000. The 2,950,000 head of ewe lambs was 2 percent below the 3,010,000 head a year earlier. The number of rams 1 year old and older totaled 643,000 -- a 5 percent decline. Wethers 1 year old and older, at 158,000, were 2 percent below a year earlier. The number of wether and ram lambs was 684,000 head, down 10 percent and the largest decline from a year earlier for any of the classes.

Stock sheep numbers in the 11 Western States plus Texas and South Dakota totaled 15,247,000 head, down 3 percent from January 1, 1966. The number of ewes 1 year old and over decreased 2 percent from the previous year. Stock sheep in these States were below a year earlier except in California which showed a slight increase and South Dakota which was the same as a year earlier.

Stock sheep on January 1, 1967 in the 35 Native States totaled 5,387,000, down 6 percent from a year earlier. Ewes 1 year old and over were down 8 percent. All 35 Native States except Connecticut showed stock sheep numbers declining or holding steady compared with a year earlier.

The January 1, 1967 value of stock sheep on farms and ranches totaled $408 million, 3 percent less than a year earlier. The January 1, 1967 value per head was $19.80, compared with $19.70 on January 1, 1966.

GOATS: The January 1, 1967 number of goats and kids on Texas farms and ranches was 4,053,000 head, 4 percent below the 4,222,000 a year earlier. The total inventory value of Texas goats was $21 million compared with $29 million for January 1, 1966. The average value per head this January 1 was $5.20, down $1.60 from a year earlier.

CHICKENS: The number of chickens on farms January 1, 1967 (excluding commercial broilers) totaled 427,619,000, an increase of 9 percent from January 1, 1966. Compared with a year earlier, the number of chickens on hand was up in all regions, with the South Atlantic States showing the largest increase -- 15 percent, followed by 13 percent in the South Central States. The smallest increase from a year earlier was the 3 percent gain in the West North Central Region.

Beginning with the estimates for January 1, 1965, the classes of chickens have been changed. The new classification separates pullets not of laying age into 2 groups -- 3 months old and older and less than 3 months old. In the old classification, some of the pullets under 3 months old were included in the pullet classification and some were classified as other chickens. Other chickens now include only cockerels used for breeding and other male chickens. Estimates on the new classification are published in this report for 1965-67. Estimates for the old classification for the years 1961-1965 are published in Statistical Bulletin 389. This provides data for 1965 on both the new and old classifications.

The number of hens and pullets of laying age on January 1, 1967 totaled 325,213,000 birds, compared with 308,984,000 a year earlier--an increase of 5 percent. Increases in layers by regions were 10 percent in the South Atlantic, 9 percent in the South Central, 4 percent in both the East North Central and West and 1 percent in both the North Atlantic and West North Central. The number of hens on farms January 1, 1967 was 138,053,000, a decrease of 3 percent from a year earlier. The decline resulted from heavier culling of hens from flocks.

The number of pullets 3 months old and older not of laying age totaled 44,035,000 on January 1, 1967, up 18 percent from a year earlier. Pullets under 3 months old totaled 51,158,000--an increase of 29 percent. The number of egg-type chicks hatched in the 3-month period July through September 1966, was up 17 percent from a year earlier, and the hatch in October-December 1966 was up 33 percent.

The total value of all chickens (excluding commercial broilers) on farms January 1, 1967 was $512 million compared with $475 million on January 1, 1966. The January 1, 1967 value per bird averaged $1.20 compared with $1.21 a year earlier.

TURKEYS: The number of all turkeys (excluding turkey fryers) on farms January 1, 1967 was 7,340,000 birds, 6 percent more than a year earlier and 15 percent above the 1961-65 average. Of the number of all turkeys on January 1, 4,211,000 were turkey breeder hens, up 7 percent from a year earlier.

Some 3,708,000 of the total breeder hens were heavy breeds, 7 percent more than a year earlier. Heavy breed hens were up from a year earlier in all but the West North Central Region where there was a decrease of 4 percent. Regional increases were less than 1 percent in the North Atlantic, 3 percent in the South Atlantic, 9 percent in the East North Central, 11 percent in the West, and 20 percent in the South Central States.

The number of light breeder hens on January 1, 1967 was 503,000, an increase of 8 percent from the 464,000 a year earlier. Increases were 17 percent in the North Atlantic Region, 19 percent in the South Central, and 32 percent in the South Atlantic. The West North Central Region was unchanged. Decreases were 1 percent in the West and 7 percent in the East North Central.

Heavy breed turkeys tested for pullorum disease from July 1 through December 1966 were 12 percent above the same period a year earlier, and light breed turkeys tested were 5 percent above a year earlier.

In early January, growers intended to raise 8 percent more turkeys in 1967 than in 1966. Growers intended to increase all heavy breeds 8 percent and light breeds 9 percent. Last year 115.5 million turkeys were raised, the highest number on record.

The January 1, 1967 value of all turkeys on farms was $36.4 million compared with $36.3 million on January 1, 1966. The average value per turkey was $4.95 compared with $5.26 a year earlier.

Index Numbers of Livestock and Poultry, on Farms, United States
January 1, 1958-1967 1/
(1957-59 average = 100)

Year	Total livestock and poultry	Meat animals	Milk cattle 2/	Poultry 3/	Year	Total livestock and poultry	Meat animals	Milk cattle 2/	Poultry 3/
1958	98	98	100	97	1963	110	110	87	99
1959	102	102	95	101	1964	112	113	83	100
1960	104	104	93	96	1965	112	112	80	103
1961	104	104	92	98	1966	111	111	75	104
1962	107	107	90	99	1967	111	111	72	113

1/ For methods of combining species and weights in construction of these index numbers see Agriculture Handbook No. 118, Volume II, Major Statistical Series of the U. S. Department of Agriculture, September 1957. For the 1955 to date weights based on 1957-59 average sales values relative to milk cows two years old and older are: milk cows, 1.00; other cattle and calves, 0.77; hogs, 0.20; sheep and lambs, 0.08; workstock, 0.45; chickens, 0.003; turkeys, 0.020. Workstock excluded beginning 1961. Excludes Alaska and Hawaii for 1960 and earlier years.

2/ For 1955 to date weights for milk cattle are: milk cows, 1.00; heifers, 1-2, 0.56; heifer calves, 0.34.

3/ Excludes commercial broilers.
