LIVESTOCK and POULTRY INVENTORY, JANUARY 1

Release:
February 13, 1964
12:00 Noon (E.S.T.)

NUMBER, VALUE, and CLASSES

On January 1, 1964 there were 106.5 million head of cattle and calves on farms and ranches, a record high, 3 percent above the 103.7 million head on hand a year earlier, according to the Crop Reporting Board. The number of milk cows and heifers 2 years old and older decreased 3 percent to 18.1 million head, the smallest number since 1905. The inventory of beef cows increased 6 percent. The number of all hogs and pigs on farms January 1, 1964 was 56.0 million head, a decline of 5 percent. Sheep and lamb numbers totaled 28.2 million head, down 6 percent, the smallest inventory of record dating to 1867. The number of chickens on farms increased 1 percent during last year to 370.5 million head on January 1, 1964, while the number of turkeys decreased 2 percent to 6.3 million head. The total value of all livestock and poultry on farms and ranches January 1, 1964 amounted to $15.7 million, down 9 percent from a year earlier.

NUMBER ON FARMS AND RANCHES JANUARY 1
UNITED STATES

Class of livestock and poultry 1/	Average 1958-62 2/	1962	1963	1964	1964 as % of 1963
	1,000 head	1,000 head	1,000 head	1,000 head	Percent
Cattle	95,567	100,002	103,736	106,488	103
Cows 2 yrs. + for milk 3/	19,883	19,167	18,679	18,073	97
Hogs	56,195	57,000	58,883	56,007	95

1/ For more specific description see headings of tables by States. 2/ Average does not include Alaska and Hawaii. 3/ Included in cattle. 4/ Included in all sheep.

The Crop Reporting Board of the Statistical Reporting Service makes this report on numbers and value of livestock and poultry on farms (including ranches) as of January 1 for the United States, from reports furnished direct by livestock and poultry producers, reports collected in assistance with the Post Office Department through the rural mail carriers and data assembled by field statisticians and cooperating State agencies. Livestock and poultry NOT on farms are excluded.

ANNUAL LIVESTOCK AND POULTRY INVENTORY - JANUARY 1, 1964

The January 1, 1964 index of livestock and poultry numbers on farms and ranches in the 48 States was 111 percent, one percent (one point) above the first of last year and only 1 percent below the record high established January 1, 1944, according to the Crop Reporting Board.

The index of numbers of meat animals (cattle, hogs and sheep) on farms increased one percent during the year for a record high. The milk cattle (milk cows, heifers, and calves) index declined three percent from the previous year while the poultry index remained unchanged.

On January 1, 1964, the aggregate value of livestock (cattle, sheep, and hogs) on ranches and farms in the United States was $15,253 million. This was a 9 percent decline from the January 1, 1963 total, and 4 percent below the 1962 value. The January 1, 1964 value of all cattle was $13,546 million, down 8 percent from a year earlier. Hogs and pigs on farms were valued at $1,309 million, 19 percent below a year earlier and the value of all sheep declined 8 percent from the January 1, 1963 value. The total inventory value of chickens was $428 million compared to $426 million a year earlier. The value of turkeys at $27.1 million declined 5 percent from the January 1, 1963 level.

The number of cattle and calves on farms and ranches January 1, 1964 was 106,488,000 head--3 percent higher than the 103,736,000 head on hand the first of last year. This is the sixth consecutive year showing an increase and is a record high number of cattle and calves. Dairy cows and replacement heifers were 3 percent below a year earlier, while other cattle (mostly beef-type) increased 5 percent. Cattle on feed January 1, 1964 in the 39 States for which estimates are made totaled 9,196,000 head, 2 percent below the number on feed the first of last year.

On January 1, 1964 there were 56,007,000 hogs and pigs on farms and ranches, 5 percent below the 58,883,000 head on farms a year earlier. The number on hand in the Corn Belt (12 North Central States) declined 4 percent. These States had 43,825,000 head the first of this year, 78 percent of the 50-State total.

Stock sheep numbers declined 5 percent during the past year to 24,533,000 head on farms January 1, 1964. This is the smallest January 1 inventory since records were begun in 1867. The number of ewes one year old and older was 19,625,000 head, 4 percent below the 20,543,000 head on farms a year earlier. Sheep and lambs on feed the first of this year totaled 3,618,000 head--11 percent less than at this time last year. All sheep and lambs on farms and ranches January 1, 1964 totaled 28,151,000 head, 6 percent fewer than January 1, 1963.

The number of goats and kids on Texas farms and ranches on January 1, 1964 was 3,978,000 head, 8 percent more than the first of last year.

The number of chickens on farms January 1, 1964 (excluding commercial broilers) totaled 370,513,000. This is 1 percent more than a year earlier. Of the total on hand January 1, 37 percent were hens, 58 percent pullets, and 5 percent other chickens. The preliminary estimate of commercial broiler production in 1963 in the 22 States covered by weekly placement reports was

1,962,302,000 birds--up 4 percent from 1962 and the largest of record for these States. The number of turkeys on farms January 1, 1964 totaled 6,315,000 birds, 2 percent below a year earlier. Of the total, 3,781,000 birds were breeder hens compared with 3,852,000 breeders on hand a year earlier. The number of heavy type breeder hens on hand the first of this year was down 3 percent, while the light type hens showed a 4 percent increase from January 1, 1963.

The total supply of feed grains and other concentrates for the 1963-64 feeding year is now estimated at 251 million tons, 2 percent more than in 1962-63. The slightly larger supply this year follows 2 years of declining supplies. The feed grain crop in 1963 of 156 million tons was 13 million tons larger than in 1962 and slightly above the previous record production in 1960, but the carryover was 9 million tons smaller than a year earlier. Stocks of hay on farms January 1 this year totaled 82 million tons, which was 3 percent less than on that date last year.

CATTLE: The inventory of cattle and calves on farms and ranches in the United States on January 1, 1964 totaled 106,488,000 head--up 3 percent from the 103,736,000 on farms a year earlier. The number of dairy stock (milk cows and replacement heifers) continued to drop and was 3 percent below a year earlier. An increase of 5 percent in other cattle more than offset this decline in the dairy herd. The January 1 total of all cattle is the highest of record and the sixth consecutive year the inventory has shown an increase.

The cattle inventory was above a year earlier in a majority of the States. The greatest percentage increase was shown by Montana, with a gain of 15 percent from the previous year. North Dakota, South Dakota, Idaho, and Wyoming were next with 9 percent each. Kentucky and Arkansas each showed increases of 6 percent. Six States showed no change in numbers, while 14 had fewer cattle on hand than on January 1, 1963.

Cattle numbers were 4 percent above a year earlier in the West North Central region. The South Central region was up 3 percent, and the Western region was up 5 percent. In the East North Central and South Atlantic regions numbers were about the same as a year ago, while the North Atlantic region dropped 3 percent from a year earlier.

Beef cattle prices for the United States during 1963 were below those in 1962 in all months except January. The sharpest decrease from 1962 occurred in December when price per hundredweight was $3.90 below December 1962.

Commercial cattle slaughter for the 48 States during 1963 totaled 27,235,300 head, up 4 percent from the year before. Calf slaughter, at 6,824,200 head, dropped 9 percent from the 7,494,300 head kill in 1962. Imports of live cattle from Canada and Mexico totaled 822,449 head during 1963, compared with 1,271,697 head in 1962.

Milk cows and heifers 2 years old and older numbered 18,073,000 head, down 3 percent from January 1, 1963. This is the tenth consecutive year of decrease. The number of dairy replacement heifers 1 to 2 years old totaled 4,560,000 head, a decline of 5 percent from a year earlier. Heifer calves kept for milk cow replacements totaled 5,021,000 head, a decrease of 2 percent.

The number of other cattle (all cattle minus milk cows and dairy replacement heifers) increased 5 percent from January 1, 1963. Cows other than those kept for milk increased 6 percent from a year earlier, reaching a record 31,779,000 head. This is the sixth consecutive year of increase. The increase in the number of cows and heifers 2 years old and older indicates a probable increase in the 1964 calf crop. The number of other heifers 1 to 2 years of age was 8,313,000 head, an increase of 5 percent from a year earlier. Steers 1 year old and older totaled 12,513,000 head, 3 percent above January 1, 1963, while other calves at 24,417,000 increased 5 percent. Bulls 1 year old and older totaled 1,812,000 head, up 4 percent from January 1, 1963. The January 1 inventory includes 9,196,000 head of cattle and calves on feed for slaughter market in 39 feeding States, 2 percent below the 9,337,000 on feed a year earlier. The number of cattle on feed in the North Central region was down 1 percent from January 1 last year and the number on feed in the 11 Western States was off 4 percent.

The total value of cattle and calves on farms and ranches January 1, 1964 was $13,546 million, a decrease of 8 percent from a year earlier. The increase in the inventory number was not sufficient to offset lower values per head. Average value per head at $127.00 was $15.00 below last year. The value of milk cows and heifers 2 years old and older totaled $3,493 million on January 1, 1964, down 9 percent from a year earlier. The average value per head for milk cows was $193.00 at the beginning of this year compared with $205.00 on January 1, 1963.

HOGS: On January 1, 1964 there were 56,007,000 hogs and pigs on farms and ranches in the United States--5 percent less than the 58,883,000 on hand a year earlier, and 9 percent less than the 61,269,000 on hand December 1, 1963.

Inventory numbers of hogs showed a decrease from a year earlier in all regions of the country, with only a few scattered States showing increases. The number of hogs and pigs on hand in the Corn Belt (12 North Central States) showed a decrease of 4 percent on January 1, 1964, with a total of 43,825,000 head, or 78 percent of the 50-State total. Iowa, the leading hog-producing State, had 4 percent fewer hogs on farms January 1, 1964 than a year earlier. The number of hogs on hand January 1, 1964 was down 6 percent from a year earlier in the North Atlantic region and 5 percent lower in the South Atlantic. Decreases were 9 percent in the South Central region and 1 percent in the Western region.

Hog prices during 1963 were lower than in 1962 in all months but June and July. Corn prices remained well above the previous year in 1963, resulting in the hog-corn ratio averaging lower in 1963 than a year earlier.

The total value of hogs on farms January 1, 1964 was $1,309 million, a decrease of 19 percent from the January 1, 1963 value of $1,619 million. The decrease in value resulted from both a decrease in numbers and value per head.

SHEEP: The number of stock sheep continued to decline for the fourth consecutive year. The January 1, 1964 number of stock sheep was 24,533,000 head, a decline of 5 percent from a year earlier and the smallest number on record since 1867. Numbers of sheep and lambs on feed for slaughter market on January 1, 1964 totaled 3,618,000 head--a decline of 11 percent from a year earlier and the lowest number since 1951. The aggregate of stock sheep and sheep and lambs being fed totaled 28,151,000 head--a reduction of 6 percent from last year.

Stock sheep inventories in all classes were lower than a year earlier. Ewes one year old and older totaled 19,625,000 head compared with 20,543,000 for January 1, 1963-- a 4 percent decline. The number of ewe lambs totaled 3,200,000 head--5 percent below the 3,378,000 head on January 1, 1963. Rams 1 year old and older, at 775,000 head, were 6 percent below a year earlier. Wether and ram lambs were down 3 percent, and wethers 1 year old and older were down 12 percent from a year earlier.

Total stock sheep numbers in the 11 Western States plus Texas and South Dakota totaled 17,728,000 head--down 3 percent from 1963. The number of ewes 1 year old and older in these States was also down 3 percent. Of these 13 States, all showed decreases in stock sheep except Montana, Wyoming, Arizona, and Washington which showed the same numbers as a year earlier. Idaho and Oregon each had 7 percent declines from a year earlier, while Colorado decreased 5 percent. Texas, the leading sheep State, and South Dakota were both off 4 percent, and California, Utah, and Nevada were each down 1 percent.

In the 35 native States stock sheep totaled 6,787,000 head, down 9 percent, while ewes 1 year old and older were down 8 percent. All of these States showed stock sheep numbers declining or holding steady compared with a year earlier, except New York which showed a 2 percent gain. Numbers in Illinois and Kansas declined 14 percent, while Minnesota and North Dakota declined 12 and 11 percent, respectively.

The January 1, 1964 value of stock sheep on farms and ranches totaled $343 million, 8 percent less than a year earlier. The January 1, 1964 value per head was $14.00, compared with $14.40 on January 1, 1963 and the 5-year average of $16.70.

GOATS: The January 1, 1964 number of goats and kids on Texas farms and ranches was 3,978,000 head, 8 percent above the 3,683,000 head on January 1, 1963. The total inventory value of goats in Texas was $30 million compared with $26 million a year earlier. Average value per head this January was $7.50, up 50 cents from January 1 a year ago.

CHICKENS: The number of chickens on farms in the United States on January 1, 1964 (excluding commercial broilers) was 370,513,000, an increase of 1 percent from the 366,823,000 birds on farms a year earlier. The number of chickens on farms was down 8 percent from a year earlier in the West North Central, and 3 percent in the East North Central States. Increases were 9 percent in the South Atlantic, 6 percent in the South Central and 2 percent in the West. Numbers in the North Atlantic region were about the same as on January 1, 1963.

The number of pullets on farms January 1, 1964 is estimated at 216,104,000 birds as compared with 213,890,000 a year earlier--an increase of 1 percent. Increases were 11 percent in the South Atlantic and 10 percent in the South Central States. Decreases were 6 percent in the West North Central, 3 percent in both the East North Central and the West, and 2 percent in the North Atlantic States. There were 135,116,000 hens on January 1, 1964 compared with 134,394,000 on January 1, 1963. Increases in hens were 12 percent in the West, 6 percent in the South Atlantic, 2 percent in the North Atlantic and South Central States.

Decreases were 13 percent in the West North Central and 4 percent in the East North Central States. The number of other chickens on hand on January 1, 1964 was 19,293,000, an increase of 4 percent from the 18,539,000 on hand a year earlier.

The hatch of egg-type chicks January through June was down 1 percent from the comparable period in 1962. The hatch July through December was 10 percent above the hatch during those months in 1962. Total hatch for the year 1963 was 2 percent above that in 1962.

Total value of all chickens (excluding commercial broilers) on farms January 1, 1964 was $428,275,000 as compared with $425,665,000 on January 1, 1963. The value per head was $1.16, the same as on January 1, 1963.

Egg prices during the period January through August averaged about 1 cent per dozen above the same period in 1962. Increases ranged from 0.1 cents in August to 3.1 cents in March. Prices during the period September through December averaged below a year earlier. Cost of the farm poultry ration averaged $3.54 per 100 pounds in 1963 as compared with $3.42 in 1962. The egg-feed and farm chicken-feed price ratios for 1963 averaged below those of 1962. The broiler-feed price ratio was also less favorable than in 1962.

Commercial broiler production during 1963 in the 22 States covered by the weekly chick placement reports was nearly 2 billion birds--up 4 percent from the number produced in 1962 and the largest of record for these States. These 22 States produced about 93 percent of the Nation's broilers in 1962. Of the 22 States, 9 produced fewer broilers than in 1962 but increases in the other States, particularly in Delaware, Maryland, North Carolina, Alabama, Mississippi, and Arkansas, resulted in an overall increase of 75 million birds.

TURKEYS: The number of turkeys (excluding turkey fryers) on January 1, 1964 totaled 6,315,000 birds, 2 percent less than the 6,475,000 on hand January 1, 1963. The number of turkey breeder hens on hand January 1, 1964 was 3,781,000 compared with 3,852,000 a year earlier. This was a decrease of 2 percent.

Of the January 1, 1964 number, 3,386,000 were heavy breed hens, 3 percent fewer than the 3,474,000 on hand January 1, 1963. Numbers of heavy breed hens on January 1, 1964 were unchanged or below last year in all regions of the country except in the South Central and South Atlantic which were up 1 and 3 percent, respectively. Decreases were 7 percent in the Western States and 1 percent in both the West North Central and North Atlantic States. The East North Central States were unchanged from January 1 a year ago. The 10 leading States accounting for 77 percent of all heavy breed hens in the Nation ranked in the order of importance were: California, Minnesota, Texas, Iowa, Oregon, Ohio, Missouri, Wisconsin, North Carolina, and Michigan.

The number of light breed hens on hand January 1, 1964 was 395,000 compared with 378,000 a year earlier--an increase of 4 percent. By regions, increases of 35 percent in the South Central, 9 percent in the East North Central, and 8 percent in the South Atlantic more than offset decreases of 12 percent in the North Atlantic and 2 percent in the West. In the West North Central there was no change in the January 1, 1964 inventory from a year earlier. The seven leading States with 79 percent of the light breed hens, ranked in order of importance, were Virginia, Minnesota, Ohio, Oregon, Missouri, Iowa, and West Virginia.

The number of heavy breed turkeys tested for pullorum disease from July 1 through December 31, 1963 was down 1 percent from the same period a year earlier. Heavy white breed testings, which accounted for 47 percent of all heavy breeds tested, were 16 percent above the same period a year earlier. While other heavy breeds (mostly bronze) were down 13 percent. The number of light breeds tested was up 15 percent.

Turkey breeder flock owners in 15 of the most important turkey States on October 1, 1963 expected to keep about the same number of heavy breed hens at the beginning of the 1964 hatching season as retained a year earlier. At that time holdings of light breed hens were expected to be up 10 percent. These October intentions compare with the actual January 1, 1964 inventory of a 3 percent decline in heavy breed hens and a 4 percent increase in light breed hens. Growers, as of January 1, 1964, indicated they intended to raise 4 percent more turkeys in 1964 than were raised in 1963. Plans were to increase heavy breeds 4 percent--heavy whites up 13 percent and other heavy breeds down 2 percent. An increase of 6 percent was planned for light breeds. The number of turkeys raised in 1963 was 93.4 million birds, about 1 percent more than in 1962.

The January 1, 1964 value of all turkeys on farms was $27,060,000 compared with $28,451,000 on January 1, 1963, a decrease of 5 percent. The average value per turkey on hand was $4.28, compared with $4.39 a year earlier.

From July through December 1963 the turkey-feed price ratio was about the same as it was during these months in 1962. During the fall months of 1963, turkey prices were slightly above this period in 1962. However, prices of turkey-feed averaged higher than a year earlier.

Index Numbers of Livestock and Poultry on Farms, 48 States
January 1, 1955-1964 1/
(1957-59 average = 100)

Year	Total livestock and poultry	Meat animals	Milk cattle 2/	Poultry 3/	Year	Total livestock and poultry	Meat animals	Milk cattle 2/	Poultry 3/
1955	104	103	111	100	1960	104	104	93	96
1956	104	104	107	98	1961	104	104	92	96
1957	100	100	105	102	1962	106	106	91	97

1/ For methods of combining species and weights in construction of these index numbers see Agriculture Handbook No. 118, Volume II, Major Statistical Series of the U. S. Department of Agriculture, September 1957. For the 1955 to date weights based on 1957-59 average sales values relative to milk cows two years old and older are: milk cows, 1.00; other cattle and calves, 0.77; hogs, 0.20; sheep and lambs, 0.08; workstock, 0.45; chickens, 0.003; turkeys, 0.020. Workstock excluded beginning 1961.
2/ For 1955 to date weights for milk cattle are: milk cows, 1.00; hiefers, 1-2, 0.56; heifer calves, 0.34.
3/ Excludes commercial broilers.

CROP REPORTING BOARD
