# LIVESTOCK and POULTRY INVENTORY, JANUARY 1

## NUMBER, VALUE, and CLASSES

On January 1, 1966 there were 106.6 million cattle and calves on farms and ranches, a reduction of 1 percent from a year earlier following 7 consecutive years of increase, according to the Crop Reporting Board. A decrease of 6 percent in the number of milk animals more than offset a 1 percent increase in beef cattle. The number of cows and heifers 2 years old and older kept for milk decreased 6 percent to 16.6 million head--the smallest number since 1900. The inventory of hogs and pigs on farms January 1, was 51.2 million head, a decline of 4 percent and the smallest inventory since 1955. All sheep and lambs totaled 26.5 million head, 1 percent below a year earlier. The number of sheep and lambs on feed January 1, was up 1 percent, while the number of stock sheep declined 1 percent. The number of chickens on farms declined 1 percent to 371.4 million head for January 1, 1966, while the number of turkeys increased 9 percent to nearly 7.0 million head.

1/ For more specific description see headings of tables by States. 2/ Average does not include Alaska and Hawaii. 3/ Included in cattle. 4/ Included in all sheep.

The Crop Reporting Board of the Statistical Reporting Service makes this report on numbers and value of livestock and poultry on farms (including ranches) as of January 1 for the United States, from reports furnished direct by livestock and poultry producers, reports collected with the assistance of the Post Office Department through the rural mail carriers and data assembled by field statisticians and cooperating State agencies. Livestock and poultry NOT on farms are excluded.

## LIVESTOCK AND POULTRY INVENTORY - JANUARY 1, 1966

(Continued from page 1)

The total value of all livestock and poultry on farms and ranches January 1, 1966 was $17.5 billion, up 22 percent from a year earlier. The aggregate value of meat animals (cattle, hogs and sheep) was $17.0 billion, 22 percent above a year earlier. The January 1, 1966 value of all cattle and calves was $14.2 billion, up 16 percent from a year earlier. The value of hogs and pigs increased 76 percent to $2.3 billion, the highest since 1948. The value of all sheep, $523.9 million, was up 24 percent. The chicken inventory was valued at $459.0 million, up 5 percent, and the value of turkeys, at $36.8 million, was up 31 percent.

The January 1, 1966 index of livestock and poultry numbers on farms and ranches in the United States was 110 percent of the 1957-59 average, compared with 111 percent a year earlier.

The index of meat animal numbers (cattle, hogs and sheep) on farms declined 1 point during the year. The index of milk cattle (milk cows plus heifers and calves kept for milk) dropped 5 percent, and the poultry index was unchanged.

CATTLE: The January 1, 1966 inventory of cattle and calves on farms and ranches in the United States was 106,557,000 head -- down 1 percent from the 107,184,000 head on farms a year earlier. Dairy stock numbers (milk cows and replacement heifers) continued to decline and were 6 percent below a year earlier. This reduction was partially offset by a 1 percent increase in the number of other cattle, mostly for beef. January 1, 1966 marked the end of seven years of record inventory highs for all cattle.

The number of cattle and calves on hand was below a year earlier in 37 States, while 11 States had more cattle on hand this year and 2 States had no change. Numbers in Colorado increased 10 percent, the largest percentage increase of any State. The sharpest reduction was 7 percent in West Virginia.

Regionally, inventory numbers in the North Atlantic were down 4 percent; the East North Central, 5 percent; the South Atlantic, 2 percent; and the West North Central, down slightly. There were increases of 1 percent in the South Central and Western regions.

Beef cattle prices for the United States in early 1965 were lower than in 1964 but rose above the 1964 level in April and were well above the remainder of the year.

Commercial cattle slaughter during 1965 totaled 32,374,500 head, up 5 percent from 1964. Calf slaughter, at 7,410,100 head, increased 2 percent. The number of cattle and calves slaughtered during 1965 totaled 39,784,600 head, 4 percent above 1964.

Imports of live cattle from Canada and Mexico totaled 1,128,278 head during 1965 compared with 546,613 head in 1964.

The number of milk cows and heifers 2 years old and older on hand January 1, 1966 was 16,607,000, down 6 percent from January 1, 1965. This was the twelfth consecutive yearly decrease. Dairy replacement heifers 1 to 2 years old totaled 4,068,000 head, down 7 percent from a year earlier. Heifer calves kept for milk cow replacements decreased 5 percent to 4,486,000 head.

Numbers of other cattle (all cattle except milk cows and dairy replacement heifers) increased 1 percent from January 1, 1965. The inventory of cows and heifers 2 years old and older other than those kept for milk dropped slightly from a year earlier to 32,636,000 head. The number of other heifers 1 to 2 years of age was 8,341,000 head, 2 percent below last year. Steers 1 year old and over totaled 12,668,000 head, 6 percent above last year. Other calves increased 2 percent to 25,927,000 head. In recent years the portion of heifer calves in the other calf inventory has increased. These may be slaughtered as heifers during the following year or carried over as heifers 1 - 2 years of age. Bulls 1 year old and over totaled 1,824,000 head, down 2 percent. The January 1 inventory included 9,963,000 head of cattle and calves on feed for slaughter market in 39 feeding States, 5 percent above a year earlier. The number on feed in the 11 Western States was up 7 percent from January 1 last year while numbers in the North Central States were 4 percent higher.

The total value of cattle and calves on farms and ranches January 1, 1966 was $14,198 million, 16 percent more than a year earlier. A higher average value per head, at $133, more than offset the small reduction in inventory numbers. The average value per head for January 1, 1965 was $114. The value of milk cows and heifers 2 years and older totaled $3,443 million on January 1, 1966, up 5 percent. The January 1, average value per head for milk cows was $207 compared with $187 a year earlier.

HOGS: The number of hogs and pigs on farms and ranches in the United States on January 1, 1966 totaled 51,230,000 head, 4 percent less than the 53,132,000 head a year earlier and 6 percent below the 54,283,000 on December 1, 1965.

Inventory numbers of hogs decreased from a year earlier in all regions except the South Atlantic which was up 2 percent and the South Central up 1 percent. In the Corn Belt (12 North Central States) January 1 numbers were down 5 percent from a year earlier. Iowa, the leading hog producing State, had 2 percent fewer hogs on farms. Hog numbers were down 7 percent in the North Atlantic States and 4 percent in the West.

The January 1, 1966 average value per head at $45.00 is sharply higher than the $24.70 a year earlier and also the highest of record. Although corn prices were higher during most of 1965, the hog-corn ratio by end of 1965 was the highest of record. The total value of hogs on farms January 1, 1966 was $2,303 million, up 76 percent from the January 1, 1965 value of $1,311 million.

SHEEP: The January 1, 1966 number of stock sheep on farms and ranches was 23,117,000 head, a decline of 1 percent from a year earlier and the smallest number since records were started in 1867. This was the sixth consecutive year of decline, however, the reduction during 1965 was much smaller than in any of the five previous years. Sheep and lambs on feed January 1, 1966 for slaughter market totaled 3,335,000 head--an increase of 1 percent over January 1, 1965. The total of stock sheep and sheep and lambs being fed was 26,452,000 head, a reduction of 1 percent from the 26,590,000 head a year earlier.

The number of lambs in the stock sheep inventory was above a year earlier, but the number of ewes 1 year old and older was below the previous year's levels. Ewes 1 year old and older totaled 18,133,000 head compared with 18,702,000 last year--a 3 percent decline. Ewe lambs totaled 3,287,000 head, 10 percent above the 2,990,000 head on January 1, 1965. Wether and ram lambs, at 811,000 head, were 17 percent above January 1, 1965. Rams 1 year old and older, at 720,000 head, were 4 percent below a year earlier. Wethers 1 year old and older were the same as last year at 166,000 head.

Stock sheep numbers in the 11 Western States plus Texas and South Dakota totaled 16,768,000 head, up 1 percent from January 1, 1965. The number of ewes 1 year old and older, however, was 3 percent below a year earlier. Nine of the 13 States showed decreases in stock sheep numbers.

Stock sheep on January 1, 1966 in the 35 Native States totaled 6,326,000 head, down 4 percent from a year earlier. Ewes 1 year old and over were also down 4 percent. All but three of the 35 States showed stock sheep numbers declining or holding steady compared with a year earlier. Nebraska, Kansas, and Oklahoma showed increases.

The January 1, 1966 value of stock sheep on farms and ranches totaled $454 million, 23 percent greater than a year earlier. The January 1, 1966 value per head was $19.70, compared with $15.80 on January 1, 1965.

GOATS: The January 1, 1966 number of goats and kids on Texas farms and ranches was 4,425,000 head, 9 percent above the 4,060,000 a year earlier. The total inventory value of goats in Texas was $30.1 million compared with $28.4 million a year earlier. Average value per head this January was $6.80, down 20 cents from January 1 a year ago.

CHICKENS: The number of chickens on farms January 1, 1966 (excluding commercial broilers) totaled 371,439,000, a decrease of 1 percent from January 1, 1965. Compared with a year earlier the number of chickens on hand was up 4 percent in both the South Atlantic and South Central and up 1 percent in the West. These increases were more than offset by decreases of 10 percent in the West North Central, 5 percent in the East North Central, and 3 percent in the North Atlantic States. Of the chickens on farms January 1, 1966, pullets accounted for 57 percent of the total, hens 38 percent, and other chickens 5 percent compared with January 1, 1965, when pullets accounted for 59 percent, hens 36 percent and other chickens 5 percent.

The number of pullets on January 1, 1966 totaled 211,635,000 birds compared with 222,093,000 a year earlier--a decrease of 5 percent. Decreases by regions were 14 percent in the West North Central, 9 percent in the North Atlantic, 8 percent in the East North Central, and 7 percent in the West. Increases were 5 percent in the South Central and 3 percent in the South Atlantic region. There were 140,340,000 hens on farms January 1, 1966, compared with 133,670,000 on

January 1, 1965. The 5 percent increase in the number of hens resulted primarily from producers holding hens in production longer to offset the smaller pullet crop and the increased emphasis on forced moulting. Increases in the number of hens by regions were 16 percent in the West, 7 percent in South Atlantic, 5 percent in the North Atlantic and 2 percent in the South Central States. The number of hens was down 1 percent in the West North Central but was unchanged in the East North Central. The number of other chickens on hand January 1, 1966 totaled 19,464,000, a decrease of 1 percent from the 19,661,000 on hand a year earlier.

Total value of all chickens (excluding commercial broilers) on farms January 1, 1966 was $459,033,000 compared with $437,993,000 on January 1, 1965. The January 1, 1966 value per head averaged $1.24 compared with $1.17 a year earlier.

The number of egg-type chicks hatched during 1965 from January through May was 14 percent below the same months of 1964, while the June through December hatch was 3 percent above the comparable period in 1964. Total egg-type chicks hatched for the year decreased 7 percent from 1964.

TURKEYS: The number of all turkeys (excluding turkey fryers) on hand January 1, 1966 was 6,986,000 birds, 9 percent more than on January 1, 1965. Of the January 1, 1966 number of all turkeys, 4,093,000 were turkey breeder hens, up 8 percent from the number a year earlier.

Of the January 1, 1966 number of breeder hens, 3,670,000 were heavy breeds, 9 percent more than the 3,370,000 heavy hens on January 1, 1965. The number of heavy breeder hens on January 1, 1966 was down 5 percent from a year earlier in the North Atlantic region, but was higher in all other regions as follows: 3 percent in the North Central, 9 percent in the West, 13 percent in the South Atlantic, and 29 percent in the South Central region.

The number of light breeder hens on January 1, 1966 was 423,000 birds, 3 percent above the 412,000 a year earlier. Regionally, increases were 8 percent in the West and 20 percent in the North Central. Decreases were: South Atlantic, 17 percent; South Central, 19 percent; and North Atlantic, 29 percent.

The number of heavy breed turkeys tested for pullorum disease from July 1 through December 31, 1965 was up 14 percent from the same period a year earlier. Heavy white breed testings -- 61 percent of all heavy breeds tested -- were 39 percent above the same period of 1964 but other heavy breeds (mostly bronze) were down 12 percent. The number of light breeds tested was down 18 percent.

Turkey breeder flock owners in 15 important turkey States on October 1, 1965 expected to keep about 4 percent more heavy breeder hens and 9 percent more light breeder hens at the beginning of the 1966 hatching season than a

year earlier. These October 1 intentions compare with the 9 percent increase in the number of heavy breeder hens and the 3 percent increase in the number of light breeder hens on January 1, 1966 for all States. Growers, as of January 1, 1966, indicated they intended to raise 7 percent more turkeys during 1966 than were raised in 1965. Plans were to increase heavy breeds 6 percent with heavy whites up 15 percent but other heavy breeds down 2 percent. Growers planned an increase of 12 percent for light breeds. The number of turkeys raised during 1965 was 104.7 million, second highest on record and 5 percent more than in 1964.

The January 1, 1966 value of all turkeys on farms was $36,808,000 compared with $28,205,000 on January 1, 1965. The average value per turkey was $5.27 compared with $4.39 on January 1, 1965.

During all months of 1965 the turkey-feed price relationship was more favorable to producers than a year earlier. Prices received by producers for turkeys in 1965 was above the corresponding month of 1964 in all months except January 1965. The average of prices received by producers for turkeys during the period September through December 1965 was above these months a year earlier but below this same period of 1963.

Index Numbers of Livestock and Poultry on Farms, United States
January 1, 1957-1965 1/
(1957-59 average = 100)

| Year | Total livestock and poultry | Meat animals | Milk cattle 2/ | Poultry 3/ | Year | Total livestock and poultry | Meat animals | Milk cattle 2/ | Poultry 3/ |
|---|---|---|---|---|---|---|---|---|---|
| | Index Numbers of Livestock and Poultry on Farms, January 1, 1957-1966 | | | | | | | | |
| 1957 | 100 | 100 | 105 | 102 | 1962 | 106 | 106 | 91 | 97 |

| 1960 | 104 | 104 | 93 | 96 | 1965 | 111 | 111 | 83 | 99 |
| 1961 | 104 | 104 | 92 | 96 | 1966 | 110 | 110 | 78 | 99 |

1/ For methods of combining species and weights in construction of these index numbers see Agriculture Handbook No. 118, Volume II, Major Statistical Series of the U. S. Department of Agriculture, September 1958. For the 1956 to date weights based on 1958-60 average sales values relative to milk cows two years old and older are: milk cows, 1.00; other cattle and calves, 0.77; hogs, 0.20; sheep and lambs, 0.08; workstock, 0.45; chickens, 0.0003; turkeys, 0.020. Workstock excluded beginning 1962. Excludes Alaska and Hawaii for 1961 and earlier years.

2/ For 1956 to date weights for milk cattle are: milk cows, 1.00; heifers, 1-2, 0.56; heifer calves, 0.34.

3/ Excludes commercial broilers.
