1970 LIVESTOCK and POULTRY INVENTORY

NUMBER, VALUE, and CLASSES

DECEMBER 1 - HOGS and PIGS
JANUARY 1 - CATTLE and CALVES
SHEEP and LAMBS
CHICKENS and TURKEYS

Release:
February 6, 1970
3:00 P.M. EST

The inventory estimates of livestock and poultry on U.S. farms and ranches show more cattle and calves, chickens and turkeys than a year earlier, but fewer hogs and pigs, and sheep and lambs. Cattle and calves on farms and ranches this January 1 are estimated at 112.3 million, up 2 percent from the 109.9 million on hand January 1, 1969. Beef cattle and calves were up 3 percent but dairy cattle and calves declined 2 percent during the year. The 56.7 million hogs and pigs on farms December 1, 1969 is 6 percent less than the 60.6 million on hand a year earlier. All sheep and lambs on hand January 1, 1970, at 20.4 million, are 4 percent below a year earlier, continuing a decline in numbers that began in 1961. Stock sheep and lambs declined 4 percent from a year earlier, while sheep on feed were down 2 percent. The number of chickens is estimated at 431.5 million, up 3 percent from January 1, 1969. Turkeys are estimated at 6.7 million, up 1 percent from a year earlier.

The value of livestock and poultry on farms and ranches totaled a record high $23.5 billion, an increase of 16 percent from the $20.3 billion a year earlier. Meat animals (cattle, hogs and sheep) accounted for $22.9 billion of the total compared with $19.7 billion a year earlier. The value of the cattle inventory is an estimated $20.2 billion, up 16 percent from a year earlier. The value of hogs and pigs is estimated at $2.2 billion, up 19 percent as higher average values per head more than offset the 6 percent decline in numbers. The value of all sheep

(Continued on page 4)

January 1 estimates of all hogs and pigs on farms have been discontinued. Hogs and pigs data relate to December 1 of the preceding year. The inventory data are the same as published in the December 1, 1969, Hogs and Pigs Report.

This report is based on data furnished by ranchers, farmers, field statisticians, and cooperating State agencies. Livestock and poultry NOT on farms are excluded from the inventory estimates.

ACTING SECRETARY OF AGRICULTURE

(Continued from page 1)

and lambs at 509.2 million was up 9 percent from a year earlier even though numbers declined. The chicken inventory is valued at $581.0 million compared with $506.1 million a year earlier. Turkeys were valued at $36.8 million on January 1, 1970 compared with $32.7 million a year earlier.

CATTLE: The January 1, 1970 inventory of all cattle and calves on farms and ranches in the Nation is estimated at 112,330,000 head, up 2 percent from the 109,885,000 head on January 1, 1969. A 3 percent increase in beef cattle more than offset a 2 percent decline in dairy cattle. The inventory of all cattle and calves for January 1, 1969, is 224,000 head more than the preliminary estimate.

The number of cattle in Texas, the Nation's leading cattle State, was up 582,000 head, or 5 percent more than a year earlier. In Arizona the number increased 8 percent, the greatest percentage increase in the Nation. In Iowa, the second ranking cattle State, it increased 1 percent.

The inventory regionally, was unchanged in the North Atlantic and East North Central States from the previous year, but increased in all other regions. It was 4 percent higher in the South Central States, and in the West North Central, South Atlantic and Western regions it increased 2 percent from a year earlier.

The January 1, 1970 number of milk cows and heifers 2 years old and older, at 13,875,000 head, was 2 percent below January 1, 1969. Milk cow numbers declined for the 16th consecutive year and are now at the lowest level since 1886. Dairy replacement heifers 1-2 years old totaled 3,461,000, down 2 percent. Heifer calves kept for milk cow replacements, at 3,859,000, also declined 2 percent from a year earlier.

Beef cattle increased 3 percent from a year earlier. The number of beef cows and heifers 2 years old and older increased 3 percent to 37,433,000 head. The number of beef heifers 1-2 years of age increased 4 percent to 9,683,000 head. And steers 1-year old and older totaled 12,999,000 head, 2 percent more than the 12,784,000 head a year earlier. The number of calves (excluding heifer calves for milk) increased 4 percent to 29,064,000. Of these calves, 42 percent are heifer calves and the remaining share (58 percent) is steer and bull calves, the same breakdown as a year earlier. Bulls over 1 year old, at 1,956,000 on January 1, 1970, were up 2 percent from the 1,911,000 head January 1, 1969.

The January 1, 1970 inventory includes 13,249,000 head of cattle and calves on feed for slaughter market in the 39 feeding States, up 6 percent from a year earlier.

Imports of cattle and calves from Canada and Mexico totaled 1,041,909 in 1969 compared with 1,039,150 in 1968.

The value of cattle and calves on farms and ranches on January 1, 1970, totaled a record $20.2 billion, a 16 percent increase from the value a year earlier. A higher average value per head, $180 compared with $158, along with a 2 percent larger inventory brought about the increase.

The value of milk cows and heifers 2 years old and older totaled $4.2 billion on January 1, 1970, up 10 percent from a year earlier. The average value per head for milk cows was $302, compared with $269 a year earlier.

HOGS: The number of all hogs and pigs on farms and ranches December 1, 1969 totaled 56,743,000 head, 6 percent less than the estimated 60,632,000 on hand a year earlier.

The value of all hogs and pigs on farms December 1, 1969 totaled $2,212 million, 19 percent above the value a year earlier. This increase in inventory value resulted entirely from higher average values per head, increasing from $30.50 on December 1, 1968 to $39.00 per head on December 1, 1969.

SHEEP: The number of stock sheep on farms and ranches continued the decline begun in 1961. The January 1, 1970 total of 17,578,000 was 4 percent below a year ago and 8 percent less than the number two years earlier.

Sheep and lambs on feed for slaughter market on January 1, 1970 totaled 2,844,000 in the 26 principal sheep feeding States--2 percent less than on January 1, 1969. Stock sheep plus sheep and lambs on feed totaled 20,422,000 head--4 percent less than a year earlier and 8 percent less than two years earlier.

All classes of stock sheep declined during 1969. Ewes 1 year old and older on January 1, 1970 totaled 14,035,000--a 4 percent decline from a year ago. Rams 1 year old and older numbered 535,000--5 percent fewer than on January 1, 1969. Wethers 1 year old and older declined 19 percent to 94,000 head. Ewe lambs, at 2,429,000, were 1 percent less than a year earlier and wether and ram lambs at 485,000 head, 3 percent less.

The number of stock sheep in the 11 Western States plus Texas and South Dakota totaled 12,986,000--4 percent fewer than on January 1, a year ago and 8 percent below 2 years earlier. The number of sheep declined in 11 of these States but increased 1 percent in Wyoming and 2 percent in Nevada. Ewes 1 year old and older on January 1, 1970 totaled 10,351,000 in these 13 States, 4 percent less than a year ago.

The number of stock sheep on January 1, 1970 in the 35 Native States was 4,565,000--down 4 percent from a year ago. Ewes 1 year old and older in these States declined 5 percent.

On January 1, 1970, stock sheep and lambs on farms and ranches were valued at 434 million dollars, 31 million dollars more than the value a year ago, and 68 million dollars more than 2 years ago. Increased value per head more than offset the decline in inventory. The average value per head was $24.70 compared with $22.00 on January 1, 1969 and $19.20 on January 1, 1968.

GOATS: The number of goats and kids on Texas farms and ranches on January 1, 1970 was 2,894,000--10 percent less than a year ago and 19 percent below 2 years earlier. Total value equaled $21,416,000--$768,000 less than on January 1, 1969 but $3,913,000 more than 2 years earlier. The average value per head was $7.40, compared with $6.90 a year earlier and $4.90 on January 1, 1968.

CHICKENS: The number of chickens on farms January 1, 1970 (excluding commercial broilers) totaled 431,533,000, up 3 percent from January 1, 1969. Hens and pullets of laying age totaled 325,712,000, up 3 percent from a year earlier. Layers were up in all regions except the West which declined 1 percent. Numbers increased 9 percent in the South Atlantic, 3 percent in the South Central, 2 percent in the West North Central, and 1 percent in the North Atlantic and East North Central. Hens 1 year old and older on farms January 1 at 139,970,000 were down 1 percent from the previous year.

The number of pullets 3 months old and older not of laying age totaled 48,817,000, up 5 percent from a year earlier. Pullets under 3 months old totaled 50,307,000, virtually the same as on January 1, 1969. Other chickens at 6,697,000 were up 2 percent. The number of egg-type chicks hatched in the 3 month period July through September 1969 was up 5 percent from a year earlier. The October through December 1969 hatch was up 3 percent.

The value of chickens (excluding commercial broilers) on farms January 1, 1970 totaled $581 million compared with $506 million a year earlier. Value per bird was $1.35 compared with $1.21 a year earlier.

TURKEYS: The number of turkeys (excluding fryers) on farms January 1, 1970 totaled 6,674,000 birds, up 1 percent from a year earlier, but 9 percent below 2 years earlier.

Turkey breeder hens totaled 3,396,000, up 3 percent from the 3,290,000 on hand a year earlier. Increased numbers of breeders in the West, South Atlantic and North Central regions more than offset declines in the North Atlantic and South Central regions. The number of breeder hens on January 1 consisted of 3,059,000 heavy breeds and 337,000 light breeds. The number of heavy hens was up 4 percent, and the inventory of light hens was the same as a year earlier.

Heavy breed turkeys tested for pullorum disease July through December 1969 were 2 percent below the same period a year earlier. Light breed testings for the same period were down 28 percent.

In early January, growers intended to raise 5 percent more turkeys in 1970 than in 1969. Intentions were to increase heavy breeds 5 percent and lights 1 percent.

The January 1, 1970 value of turkeys (excluding fryers) on farms totaled $36.8 million, compared with $32.7 million a year earlier. The average value per bird was $5.50, compared with $4.95 on January 1, 1969.

Index Numbers of Livestock and Poultry, on Farms, United States, January 1, 1961-1970 1/
(1957-59 average = 100)

1/ For methods of combining species and weights in construction of these index numbers see Agriculture Handbook No. 118, Volume II, Major Statistical Series of the U. S. Department of Agriculture, September 1957. Weights based on 1957-59 average sales values relative to milk cows two years old and older are: milk cows, 1.00; beef cattle and calves, 0.77; hogs, 0.20; sheep and lambs, 0.08; workstock, 0.45; chickens, 0.003; turkeys, 0.020. Workstock excluded beginning 1961. Excludes Alaska and Hawaii for 1960 and earlier years.
2/ Hogs and pigs data relate to December 1 preceding year beginning with 1962.
3/ Weights for milk cattle are: milk cows, 1.00; heifers, 1-2, 0.56; heifer calves, 0.34.
4/ Excludes commercial broilers.
