LIVESTOCK and POULTRY INVENTORY, JANUARY 1

NUMBER, VALUE, and CLASSES

On January 1, 1965, there were 107.2 million cattle and calves on farms and ranches, a record high, but only slightly greater than the 106.7 million head on hand a year earlier, according to the Crop Reporting Board. A decline of 3 percent in the number of milk animals was more than offset by an increase in beef-type cattle. The number of milk cows and heifers 2 years old and older decreased 3 percent to 17.6 million head--the smallest number since 1904. The inventory of beef cows increased 3 percent, while the number of steers 1 year and older declined 5 percent. The number of all hogs and pigs on farms January 1 was 53.1 million head, a decline of 9 percent. Sheep and lamb numbers totaled 26.7 million, down 5 percent--the smallest inventory of record. The number of chickens on farms increased 2 percent during last year to 376.7 million on January 1, 1965, and the number of turkeys increased 4 percent to 6.5 million head.

Turkeys	6,294	6,475	6,243	6,471	104

1/ For more specific description see headings of tables by States. 2/ Average does not include Alaska and Hawaii. 3/ Included in cattle. 4/ Included in all sheep.

The Crop Reporting Board of the Statistical Reporting Service makes this report on numbers and value of livestock and poultry on farms (including ranches) as of January 1 for the United States, from reports furnished direct by livestock and poultry producers, reports collected with the assistance of the Post Office Department through the rural mail carriers and data assembled by field statisticians and cooperating State agencies. Livestock and poultry NOT on farms are excluded.

"LIVESTOCK AND POULTRY INVENTORY, January 1" - LvGn 1 (65)

Page 5- 5th line of third paragraph should read 748,000 instead of 748,000,000.

Page 21- Column two, January 1, 1964 Hogs, for Mississippi should read $19.90 instead of $19.10.

Page 23- Column five, January 1, 1965 Hens for Colorado should read 646 instead of 717 - 48 States 134,141 instead of 134,212 - U. S. 134,409 instead of 134,480.

Column six January 1, 1965 Pullets for Colorado should read 717 instead of 646 - 48 States 221,921 instead of 221,850 - U. S. 222,711 instead of 222,640.

CROP REPORTING BOARD

LIVESTOCK AND POULTRY INVENTORY - JANUARY 1, 1965

(Continued from page 1)

The total value of all livestock and poultry on farms and ranches January 1, 1965 amounted to $14.4 billion, down 9 percent from a year earlier. The aggregate value of livestock (cattle, sheep, and hogs) was $13,959 million, 9 percent below January 1, 1964. The January 1, 1965 value of all cattle was $12,215 million, down 10 percent from a year earlier. The value of hogs and pigs on farms declined 3 percent to $1,318 million. The value of all sheep, $425 million, was up 7 percent. The total inventory value of chickens was $440 million, 3 percent above a year earlier, and the value of turkeys at $28.4 million was up 6 percent.

The January 1, 1965 index of livestock and poultry numbers on farms and ranches in the United States was 111 percent of the 1957-59 average, compared with 112 a year earlier.

The index of numbers of meat animals (cattle, hogs and sheep) on farms declined one point during the year. The index of milk cattle (milk cows, heifers and calves) fell 3 percent, but the poultry index increased 2 points.

CATTLE: The January 1, 1965 inventory of cattle and calves on farms and ranches in the United States was 107,152,000 head -- up slightly from the 106,743,000 on farms a year earlier. Dairy stock numbers (milk cows and replacement heifers) continued to decline and was 3 percent below a year earlier. This reduction was more than offset by a 2 percent increase in the number of other cattle, mostly beef-type. This is the seventh consecutive year of record inventory highs for all cattle.

The number of cattle and calves was below a year earlier in 23 States, but 21 States had more cattle on hand January 1. Six States showed no change. Montana and South Dakota had gains of 5 percent each, the largest percentage increase. New Mexico had the sharpest percentage drop, 12 percent.

Regionally, the North Atlantic was down 2 percent, and the East North Central down 1 percent, but all other regions showed increases. The West North Central, South Atlantic, and South Central showed 1 percent increases, the Western region increased only slightly.

Beef cattle prices for the United States during 1964 were below those in 1963 in all months. The sharpest decrease was in January 1964 when price per hundredweight was $3.10 below January 1963.

Commercial cattle slaughter for the 48 States during 1964 totaled 30,777,600 head, up 13 percent from the year before. Calf slaughter, at 7,227,200 head, increased 6 percent.

Imports of live cattle from Canada and Mexico totaled 546,613 head during 1964, compared with 822,449 head in 1963.

Milk cows and heifers 2 years old and older numbered 17,593,000 head, down 3 percent from January 1, 1964, the eleventh consecutive yearly decrease. Dairy replacement heifers 1 to 2 years old totaled 4,374,000 head, down 4 percent from a year earlier. Heifer calves kept for milk cow replacements decreased 2 percent to 4,874,000 head.

Numbers of other cattle (all cattle except milk cows and dairy replacement heifers) increased 2 percent from January 1, 1964. The inventory of cows other than those kept for milk increased 3 percent from a year earlier, a record 32,883,000 head. This is the seventh consecutive yearly increase. The increase in the number of all cows and heifers 2 years old and older indicates a probable increase in the 1965 calf crop. The number of other heifers 1 to 2 years of age was 8,513,000 head, up 2 percent from a year earlier. Steers 1 year and older totaled 11,926,000 head, 5 percent below last year but other calves increased 2 percent to 25,133,000. Bulls 1 year and older totaled 1,856,000 head, up 2 percent. The January 1 inventory includes 9,486,000 head of cattle and calves on feed for slaughter market in 39 feeding States, 1 percent above the 9,433,000 on feed a year earlier. The number of cattle on feed in the 11 Western States was up 2 percent from January 1 last year, but the North Central region showed no change.

The total value of cattle and calves on farms and ranches January 1, 1965 was $12,215 million, 10 percent less than a year earlier. Increases in the inventory numbers were not sufficient to offset lower values per head. Average value per head, at $114.00, was $13.00 below last year. The value of milk cows and heifers 2 years and older totaled $3,282 million on January 1, 1965, down 6 percent. The average value per head for milk cows was $187.00 at the beginning of this year compared with $193.00 on January 1, 1964.

HOGS: Hogs and pigs on farms and ranches in the United States on January 1, 1965 totaled 53,052,000 head, 9 percent less than both the 58,119,000 a year earlier, and the 58,217,000 on hand December 1, 1964.

Inventory numbers of hogs decreased in all regions but several States showed increases. The number of hogs and pigs on farms January 1, 1965 in the Corn Belt (12 North-Central States) decreased 8 percent from a year earlier to 41,960,000 head. Iowa, the leading hog-producing State, had 5 percent fewer hogs on farms on January 1, 1965 than a year earlier. Numbers of hogs on hand in the North Atlantic and South Atlantic regions were each down 10 percent. Decreases were 13 percent in the South-Central region and 12 percent in the Western region.

Hog prices were slightly lower in 1964 than in 1963 but corn prices were slightly higher, resulting in a lower hog-corn ratio in 1964 than the previous year.

Total value of hogs on January 1, 1965 was $1,318 million, down 3 percent from the January 1, 1964 value of $1,358 million because of smaller numbers. The average value per head was $1.40 more than a year earlier.

SHEEP: The number of stock sheep declined for the fifth consecutive year. The January 1, 1965 number of stock sheep was 23,341,000 head, a decline of 4 percent from a year earlier and the smallest number on record since 1867. Numbers of sheep and lambs on feed for slaughter market on January 1, 1965 totaled 3,327,000 head -- a decline of 9 percent, the lowest number since 1918. The aggregate of stock sheep and sheep and lambs being fed was 26,668,000 head -- a reduction of 5 percent from last year.

Stock sheep inventories in all classes were lower than a year earlier. Ewes one year old and older totaled 18,732,000 head compared with 19,462,000 for January 1, 1964 -- a 4 percent decline. The number of ewe lambs totaled 3,003,000 head -- 7 percent below the 3,213,000 head on January 1, 1964. Rams 1 year old and older, at 748,000,000 head, were 3 percent below a year earlier. Wether and ram lambs were down 5 percent, as were wethers 1 year and older.

Stock sheep numbers in the 11 Western States plus Texas and South Dakota totaled 16,769,000 head, down 4 percent from 1964. The number of ewes one year and older in these States was down 4 percent. Nine of these 13 States showed decreases in stock sheep number except Idaho, Arizona, Utah, and Nevada. Increases were 5 percent in Arizona and 1 percent in both Utah and Nevada. Decreases in stock sheep numbers in New Mexico were down 11 percent; South Dakota 8 percent; Texas 7 percent; Washington, Oregon, and Montana each 5 percent; Wyoming 2 percent; and California 1 percent. Numbers of stock sheep in Idaho remained the same.

Stock sheep in the 35 Native States totaled 6,552,000 head, down 4 percent while ewes 1 year old and older were down 4 percent. All of these States showed stock sheep numbers declining or holding steady compared with a year earlier except New York, Pennsylvania, Indiana, and Iowa.

The January 1, 1965 value of stock sheep on farms and ranches totaled $370 million, 8 percent more than a year earlier. The January 1, 1965 value per head was $15.80, compared with $14.00 on January 1, 1964 and $15.70, the 5-year average.

GOATS: The January 1, 1965 number of goats and kids on Texas farms and ranches was 4,060,000 head, 4 percent above the 3,904,000 head on January 1, 1964. The total inventory value of goats in Texas was $28.4 million compared with $29.3 a year earlier. Average value per head this January was $7.00, down 50 cents from January 1 a year ago.

CHICKENS: The number of chickens on farms in the United on January 1, 1965, (excluding commercial broilers) was 376,714,000 an increase of 2 percent from a year earlier. The number of chickens was up 6 percent in both the South Atlantic and South Central States, and up 4 percent in the Western States. Decreases of 5 percent occurred in West North Central States and 2 percent in the North Atlantic States. The East North Central region was unchanged from a year earlier.

The number of all pullets on farms January 1, 1965 is estimated at 222,711,000 birds as compared with 215,781,000 a year earlier -- an increase of 3 percent. Increases by regions were 9 percent for the South Atlantic and South Central, 4 percent in the West, and 3 percent in the East North Central. Decreases by regions were 4 percent in the West North Central and 3 percent in the North Atlantic States. There were 134,409,000 hens on January 1, 1965, compared with 134,894,000 on January 1, 1964. Increases in the number of hens by regions were 5 percent in the West, 2 percent in the South Central, and 1 percent in the South Atlantic States. Decreases by regions were 7 percent in the West North Central and 5 percent for the East North Central. The North Atlantic region was about the same as January 1, 1964. The number of other chickens on hand January 1, 1965 was 19,594,000, an increase of 2 percent from the 19,284,000 on hand a year earlier.

Hatch of egg-type chicks January through June 1964 was about the same as the comparable period in 1963. The hatch July through December was 9 percent above the same period in 1963. Total egg-type hatch for the year 1964 rose 3 percent.

Total value of all chickens (excluding commercial broilers) on farms January 1, 1965 was $439,565,000 compared with $427,544,000 on January 1, 1964. Value per head averaged $1.17 January 1, 1965 compared with $1.16 a year earlier.

The 2,306,066,000 broilers hatched during 1964 (not included in the inventory numbers) exceeded the previous year by 2 percent and established a new record.

TURKEYS: The number of turkeys (excluding turkey fryers) on hand January 1, 1965 was 6,471,000 birds, 4 percent more than the 6,243,000 birds on January 1, 1964. The number of turkey breeder hens on January 1, 1965 was 3,835,000 birds, up 1 percent over the 3,786,000 on hand a year earlier.

Of the January 1, 1965 number of breeder hens, 3,410,000 were heavy breeds 1 percent more than the 3,382,000 on hand January 1, 1964. The number of heavy breeder hens on January 1, 1965 was higher in three regions, West North Central 4 percent, South Atlantic 6 percent, and Western 3 percent. A decrease in turkey numbers was shown in the other 3 regions, North Atlantic 14 percent, East North Central 8 percent, and South Central States 2 percent.

The number of light breeder hens on January 1, 1965 was 425,000 birds compared with 404,000 a year earlier - - an increase of 5 percent. Regionally, increases were 68 percent in the South Central, 18 percent South Atlantic, 3 percent East North Central, and 2 percent in Western States. The North Atlantic region was unchanged from a year earlier, but there was a decrease of 13 percent in the West North Central States.

Numbers of heavy breed turkeys tested for pullorum disease from July 1 through December 31, 1964 were down 2 percent from the same period a year earlier. Heavy white breed testings -- 49 percent of all heavy breeds tested -- were 10 percent above the same period a year earlier, but other heavy breeds (mostly bronze) were down 12 percent. The number of light breeds tested was up 18 percent.

Turkey breeder flock owners in 15 of the most important turkey States on October 1, 1964 expected to keep about 4 percent more heavy breeder hens and 1 percent more light breeder hens at the beginning of the 1965 hatching season than a year earlier. These October intentions compared with the 1 percent increase in heavy breeder hens and 5 percent increase in light breeder hens on January 1, 1965 inventory for all States. Growers, as of January 1, 1965 indicated they intended to raise 4 percent more turkeys this year than were raised in 1964. Plans were to increase heavy breeds 2 percent with heavy whites up 12 percent and other heavy breeds down 5 percent. Growers plan an increase of 13 percent for light breeds. The number of turkeys raised in 1964 was 99.5 million birds, second highest on record and 7 percent more than in 1963.

The January 1, 1965 value of all turkeys on farms was $28,418,000 compared with $26,714,000 on January 1, 1964. The average value per turkey on hand was $4.39, compared with $4.28 a year earlier.

From July through December 1964 the turkey-feed price ratio was down slightly from a year earlier. During the fall months of 1964, turkey prices were slightly lower than the same months a year earlier but prices of turkey feed also averaged lower than a year earlier.

Index Numbers of Livestock and Poultry on Farms, United States
January 1, 1956-1965 1/
(1957-59 average = 100)

Year	Total livestock and poultry	Meat animals	Milk cattle 2/	Poultry 3/	Year	Total livestock and poultry	Meat animals	Milk cattle 2/	Poultry 3/
1956	104	104	107	98	1961	104	104	92	96
1957	100	100	105	102	1962	106	106	91	97
1958	98	98	100	97	1963	110	110	89	97
1959	102	102	95	101	1964	112	112	86	97
1960	104	104	93	96	1965	111	111	83	99

1/ For methods of combining species and weights in construction of these index numbers see Agriculture Handbook No. 118, Volume II, Major Statistical Series of the U.S. Department of Agriculture, September 1957. For the 1955 to date weights based on 1957-59 average sales values relative to milk cows two years old and older are: milk cows, 1.00; other cattle and calves, 0.77; hogs, 0.20; sheep and lambs, 0.08; workstock, 0.45; chickens, 0.003; turkeys, 0.020. Workstock excluded beginning 1961. Excludes Alaska and Hawaii for 1960 and earlier years.
2/ For 1955 to date weights for milk cattle are: milk cows, 1.00; heifers, 1-2, 0.56; heifer calves, 0.34.
3/ Excludes commercial broilers.
