

USDA Egg Markets Overview

A weekly publication of the USDA AMS Livestock and Poultry Program, Livestock, Poultry, and Grain Market News Division

September 05, 2025

Negotiated wholesale prices for graded loose caged eggs are firm on mostly moderate demand for moderate supplies and offerings. Trading is moderate. Wholesale prices for national trading of trucklot quantities of graded, loose, White Large shell eggs increased \$0.07 to \$2.16 per dozen with a firm undertone. The wholesale price on the New York market for formula trading of Large cartoned shell eggs delivered to retailers held steady at \$2.61 per dozen with a steady undertone. In the major Midwest production region, wholesale prices for Large, white, shell eggs delivered to warehouses were unchanged at \$2.50 per dozen with a steady undertone while the price to producers for Large cartoned shell eggs held at \$2.32 per dozen. The California benchmark for Large shell eggs was unchanged at \$3.09 per dozen with a steady undertone. Delivered prices on the California-compliant wholesale loose egg market rose \$0.35 to \$2.65 per dozen with a firm undertone. Demand is light to moderate for light to moderate offerings and moderate supplies. Trading is slow to moderate.

Shell egg demand improved slightly into the holiday weekend with some favorable response to grocery retailer promotional efforts. Demand has been subdued since the record-setting highs of late winter as production slowly recovers and wholesale and retail prices slowly retreat. As August began, demand was at its third lowest recorded level of the year but has since been on a slow upward trajectory – improving 40% by the start of September. Grocers, with growing confidence in supply, have been providing ample space to shell eggs in their weekly circulars and ad pricing has slowly declined, as has everyday pricing. Demand from egg products manufacturers, light ahead of the holiday weekend, is improving this week as processing schedules return to normal. Most were able to satisfy their breaking needs by drawing from inventory and owned-production while waiting for developments in the carton market. Imports continue to temper demand for domestic production even as shipments continue to slow from early-year peaks.

Overall feature activity slows from last week's pace but stores are offerings sale prices on a wide range of shell egg types. Feature activity for conventional caged eggs increases and the average ad price decreases \$0.05 to \$2.23 per dozen. Featuring of [UEP-certified](#) cage-free shell eggs is the most active category this cycle, accounting for 40% of all shell egg ads this week. The average ad price increases \$0.27 to \$3.20 per dozen. Nutritionally-enhanced shell eggs are seeing a very active level of featuring this week with brown-shelled, cage-free offerings taking the lead. Organic pastured shell eggs enjoy an uptick in featuring with the balance of this week's promotions spread out among organic and non-organic varieties.

The overall shell egg inventory decreased about 1.5% while the national inventory of Large class shell eggs rose 2%. Stocks of Large shell eggs in the Midwest production region rose nearly 13% as movement slowed at retail outlets over the Labor Day weekend. The inventory share of Large class shell eggs gained 1.5% to a 51.5% share of all shell egg stocks on inventory at the start of the week. Stocks of cage-free eggs rose 5% to support

Egg Markets Overview

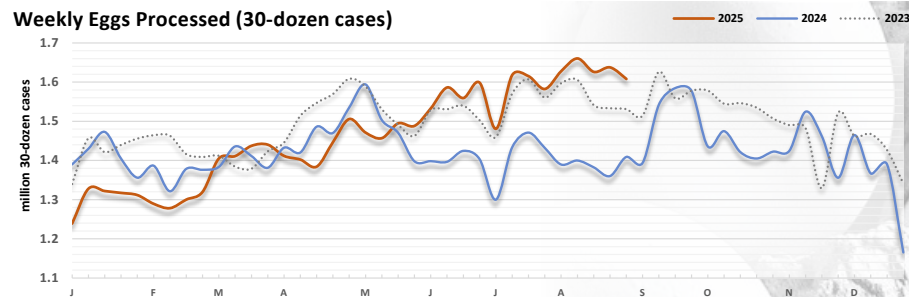

a significant increase in retail featuring this ad cycle while the inventory of organic shell eggs increased just over 11.5%, partially to support increased retail promotion. Stocks of nutritionally-enhanced eggs were down slightly as eggs moved into stores to support feature activity and supplies of breaking stock declined one percent as production slowed over the holiday break. Total estimated table egg production is up slightly from last week and down nearly one percent from last year to a year-to-year deficit the equivalent of 4.9 million cases in total.

The average national wholesale price for breaking stock was unchanged at \$1.40 per dozen with a steady undertone. Demand and offerings are light to moderate with moderate to reduced supplies. Processing schedules are full-time and trading is slow to moderate. The volume of eggs processed during the holiday week declined 2% and the share of weekly table egg production was down a half percent at 34.5%. Cage-free stock accounted for 37.5% of eggs processed last week, up a half percent in share. Production of whole egg was unchanged and production of egg components decreased with whites by 4% and yolks by nearly 6%. Dried egg production was down 5% as was the production of inedible eggs. Breaking yields without inedible declined slightly to 41.73 pounds per case broken.

Wholesale prices for certified liquid whole eggs are weak on a range of demand for light offerings and light to moderate supplies. Trading is moderate. Wholesale prices for whole frozen eggs declined \$0.65 to \$1.35 per pound and prices for frozen whites declined \$0.41 to \$1.24 per pound. The undertone is steady with light to moderate demand and light to moderate offerings and supplies with moderate trading. Prices for dried whole eggs declined \$3.43 to \$12.57 per pound and prices for dried yolk were down \$2.83 to \$13.17 per pound. Dried albumen remains untested. The undertone is steady with moderate to good demand for light offerings. Supplies are light to very light and trading is mostly moderate.

According to NASS, the June monthly volume of frozen eggs in storage increased 7% from May but 48% below the prior year. Stocks of whole frozen egg increased 8%, 44% below last year and the share of whole egg stocks was unchanged at 44% of total frozen stocks. Stocks of frozen yolk increased 16% and were 40% below the level from last year. Frozen egg whites gained 8% to a level 55% below last year. Stocks of unclassified eggs rose 6% from last month and were down 51% from last year. The share of unclassified frozen stocks declined one percent to a 45% share of total frozen stocks.

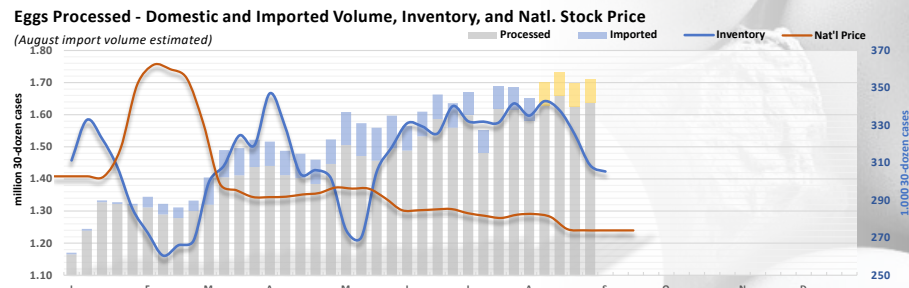

As of August 1, 2025, the estimated U.S. non-organic commercial cage-free table egg flock increased 2% to 116.3 million, 39.2% of the current U.S. table egg flock. This represents a 12% increase over the number of non-organic, cage-free table egg layers on August 1, 2024, and a 5% increase in the share of the total commercial table egg flock. The USDA certified organic table egg layer flock on August 1 was down slightly from July at 6.7% of the total layer flock. The ratio of caged to cage-free layers currently stands at 54/46 as compared to 53.5/46.5 last month and 59/41 last year.

2025 Commercial Table Egg Flock HPAI Losses as of September 05, 2025

No new outbreaks of highly pathogenic avian influenza (HPAI) were reported over the past week in commercial table egg flocks. In 2025 to date, based on the latest data from APHIS, HPAI in commercial table egg layer flocks have resulted in the depopulation of 36.3 million birds. To date, USDA APHIS has confirmed 44 outbreaks in layer flocks in 10 states (AZ, CA, IA, IN, MO, NC, OH, PA, SD, and WA). The 36.3 million birds lost included 21.6 million (59.4%) in conventional caged systems and 14.8 million (40.6%) in cage-free systems. These losses represent 11.8% of the conventional caged layer flock and 14.6% of the non-organic cage-free flock on January 1, 2025.

Compared to January 1, the caged flock on August 1 was down 12% while the cage-free flock was up 15% and the organic table egg flock was down 1.6%.

Egg Markets Overview

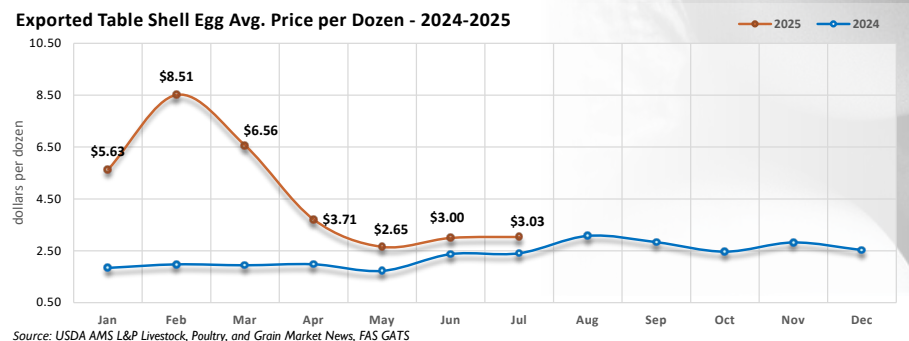

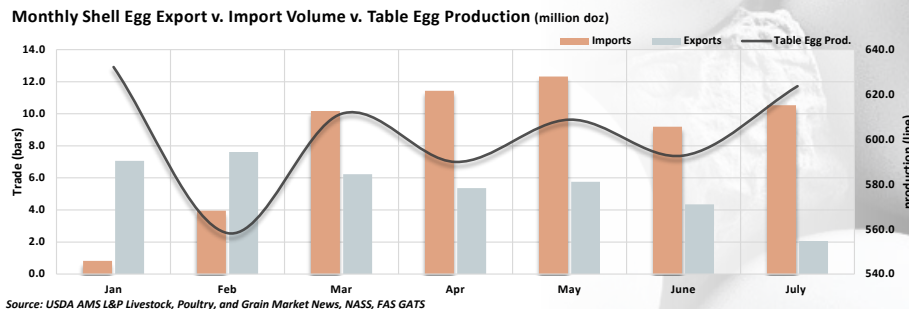

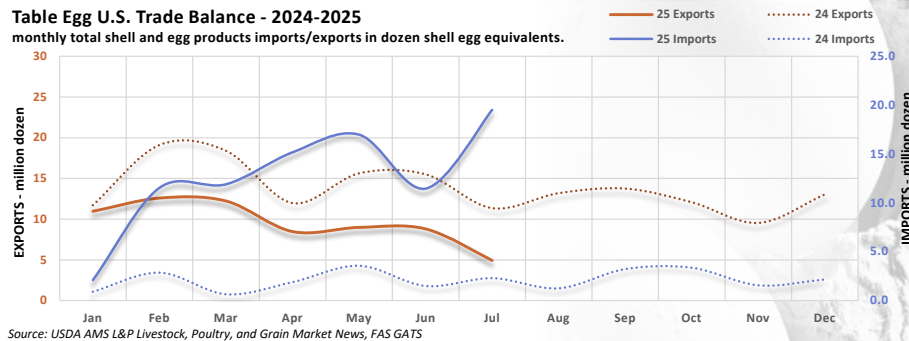

The overall export volume of shell egg and egg products in July increased 27 percent; one percent below the year ago level but the overall value for the month was down 21 percent, 5 percent under last year. The export volume of table shell eggs decreased 53 percent from last month, 62 percent under last year as producers continue to hold back production for the domestic market. The overall value of table egg exports decreased 52 percent for the month but the average price per dozen exported was up one percent (from \$3.00 to \$3.03 per dozen). Canada remains the primary U.S. export market for table shell eggs with 56 percent of the monthly and 82 percent of the annual shipments to date. The Bahamas remains a very distant second with 6 percent of annual exports. The U.S. exported table shell eggs to 195 trade partners in July - 25 for the year to date – with the top 5 accounting for 97 percent.

The volume of all egg products exported in July doubled from June, 54 percent over year ago levels, and the total value of all egg product exports increased 15 percent. Exports of liquid egg products increased 2 percent for the month but with a 3 percent decline in value. The volume of exported liquid whole egg was down 20 percent as shipments were reduced to many destinations. Liquid albumen exports declined 27 percent primarily on reduced shipments to Ireland and the Netherlands from the prior month. Exports of liquid yolk increased 27 percent with Japan leading all markets with some support from South Korea and Canada.

Exports of dried egg products in July rose sharply, up 382 percent; up 46 percent from last year, with a 93 percent increase in value. Exports of whole dried egg drove the monthly increase with a nearly 6-fold increase, driven primarily by Canada but supported by increased to Brazil and Denmark. Exports of dried yolk increased 73 percent nearly all contributed to a large shipment to Canada although Japan remains the top destination for the year to date. Shipments of dried albumen were very limited as the top 2 destinations, Canada and Japan, were out of the market.

Overall imports of shell and egg products rose 70 percent in July and the overall value was up 51 percent as prices continue to moderate. Imports of shell eggs continue to drive the monthly increases, up 15 percent in volume and 9 percent in value. Brazil dominated the sector with 48 percent of monthly volume followed by Mexico with 27 percent and these two nations account for 63 percent of all imports to date. Germany, Russia, and Saudi Arabia were added to the list of nations shipping shell eggs to the U.S.

Imports of egg products increased fourfold, driven by increased imports of dried egg products. Imports of liquid egg products rose 3 percent led by a 34 percent increase in liquid whole egg and a 28 percent increase in liquid albumen. Vietnam and China were the main suppliers of whole egg while Canada provided all of the albumen. Liquid yolk shipments declined 61 percent as last month's major shippers reduced their trade volume. Imports of dried egg products increased 8-fold, almost entirely on a significant volume of dried albumen from Lithuania that doubled the year-to-date total. Imports of whole dried egg rose 32 percent, again, with Lithuania as the source. No imports of dried yolk were recorded in July.
