## Summary

**United States Average Layers Down 3 Percent:** Layers during 2025 averaged 365 million, down 3 percent from the year earlier. The annual average production per layer on hand in 2025 was 288 eggs, down 1 percent from 2024.

**United States Egg Production Down 4 Percent:** Egg production during the year ending November 30, 2025 totaled 105 billion eggs, down 4 percent from 2024. Table egg production, at 90.1 billion eggs, was down 4 percent from the previous year. Hatching egg production, at 15.2 billion eggs, was down 1 percent from 2024.

**United States December 1 Chicken Inventory:** The total inventory of chickens on hand on December 1, 2025 (excluding commercial broilers) was 520 million birds, down 1 percent from last year.

**United States Total Value:** The total value of all chickens on December 1, 2025 was \$4.35 billion, up 4 percent from December 1, 2024. The average value increased from \$7.97 per bird on December 1, 2024, to \$8.37 per bird on December 1, 2025.

## Statistical Methodology

**Survey Procedures:** Primary data for the *Chickens and Eggs* report are from monthly questionnaires sent to producers. An attempt is made to collect information for layer and egg estimates from each known contractor and independent producer who has at least 30,000 table egg layers, flocks of hatchery supply layers, or pullet only operations with at least 500 pullets. Coverage for operations with less than 30,000 table egg layers are estimated each month based on Agricultural Census data and data reported in December. Approximately 500 contractors, independent egg producers, and pullet only operations are contacted each month.

**Estimating Procedures:** Sound statistical methodology is employed to derive estimates from the reported data. All data are analyzed for unusual values. Data from each operation are compared to their own past operating profile and to trends from similar operations. Data for missing operations are estimated based on similar operations or historical data. NASS field offices prepare these estimates by using a combination of survey indications and historic trends. Individual State estimates are reviewed by the Agricultural Statistics Board for reasonableness.

**Revision Policy:** The previous 24 month's estimates are subject to revision if late reports or corrected data indicates a different level. Estimates will also be reviewed after data from the Department of Agriculture five-year Census of Agriculture are available. No revisions will be made after that date.

**Reliability:** Estimates are based on a census of all known contractors and independent producers who have at least 30,000 table egg layers, flocks of hatchery supply layers, and pullet only operations with at least 500 pullets and therefore, have no sampling error. However, estimates are subject to errors such as omission, duplication, and mistakes in reporting, recording, and processing the data. While these errors cannot be measured directly, they are minimized through strict quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness.

## Terms and Definitions of Chickens and Eggs Estimates

**All Layers** includes both table egg and hatching egg flocks regardless of size.

**Molted Layers** is the same data series as the previously published Forced Molt Layers. Nomenclature changed as of January 2015.

# USDA's 102nd Annual Agricultural Outlook Forum

Hybrid

February 19-20, 2026 • Crystal Gateway Marriott, Arlington VA

**Registration is now open to USDA's 102nd Agricultural Outlook Forum!**

USDA's 102nd Annual Agricultural Outlook Forum will be held at the Crystal City Gateway Marriott on February 19-20, 2026, and all Forum sessions will be livestreamed on a virtual platform. Join USDA's new Chief Economist, Justin Benavidez, as he unveils the USDA's initial 2026 forecast for the agricultural economy, commodity markets, trade, and farm income. Hear how cutting-edge technologies and artificial intelligence are modernizing agricultural production practices and reshaping markets. Learn from more than 80 subject matter experts, executives, and academics as they explore some of the most pressing issues impacting agriculture.
