European whey prices took a step lower. While there is still good demand for whey protein concentrates, the demand for dry whey has eased, especially within feed markets. Industry sources suggest there are ample amounts of liquid whey coming from the cheese vats. While a significant portion of the liquid whey is being used in concentrate production, dry whey production is steady, and inventories for dry whey are growing.

Prices for: Western Europe, All First Sales, Free on Board - Port, , Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/MT:	775 - 1,100
