Report 31

August 1, 2024

MMN Slug ID 1048 /Slug Name: MD_DA640

Email us with accessibility issues with this report.

Low/medium heat nonfat dry milk (NDM) prices moved higher across all facets of the range and mostly price series in the West. Domestic demand varies from stronger to steady. Some sellers indicate interest from buyers in Mexico is picking up. Stakeholders convey spot load availability is much tighter for most of the southwest portion of the region compared to elsewhere in the West region. Production schedules are seasonally lighter, and some skim milk powder production has taken the place of NDM production. High heat NDM prices also moved higher. Demand is stronger and availability is not abundant. Production schedules are mixed.
