Direct Hay Weighted Average Report for week ending 11/1/2024

Compared to the last report: Hay prices are mostly steady across all regions. Hay movement and demand are beginning to pick up. Livestock producers have begun some supplemental feeding as pastures enter dormancy. According to the US Drought Monitor, widespread degradation took place over much of northern and eastern Texas and into the southern portions of the state, where almost every drought category intensified, most now in severe drought or worse. Moderate and severe drought expanded over portions of West Texas as well.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.

*** The next report release will be November 15th, 2024***

Volume			
	This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.
