Direct Hay Weighted Average Report for week ending 2/5/2021

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay prices are firm to 10.00 higher in the Panhandle, West, North, and Central Texas. Hay prices in the East and South are mostly steady to firm. Forages in the majority of the state are becoming more scarce as a lot of the hay that normally comes into the state from Colorado, New Mexico, Kansas, and Oklahoma has been limited due to drought conditions in those areas as well. According to the U.S. Department of Agriculture, Texas led the Plains in late January with 41% of its winter wheat rated in very poor to poor condition. As a result, wheat pasture grazing has been limited this year causing producers to sell early or begin supplemental feeding. A lot of the hay that is still in storage has already been contracted and is just awaiting delivery.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.

*** The next report release will be February 19th***

Central						
Hay (Conventional)						
Alfalfa - Premium/Supreme (Ask/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
