Direct Hay Weighted Average Report for week ending 9/19/2025

Compared to the last report: Hay prices are mostly steady with some instances of 5.00 lower and light demand. Gordo hay reported at \$65.00 - \$70.00 for large squares in South Texas (see below Grass hay 65-70/ bale). Adequate to excellent supplies were reported in all regions. According to the US Drought Monitor, For the long-term drought areas designated in Texas, a round of heavy precipitation (more than 1.5 inches) this past week resulted in 1-category improvements. Based on the 120-day SPI and NASA SPoRT soil moisture, D0 was expanded across southwestern Oklahoma with the addition of a small moderate drought (D1) area. 30 to 60-day SPIs along with declining soil moisture supported an increasing coverage of D0 across the Texas Panhandle and Edwards Plateau. The next available hay report will be October 03, 2025.

Volume			
	This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.
