Direct Hay Weighted Average Report for week ending 11/12/2021

Volume			
	This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay prices are steady in all regions. Trading activity and demand were moderate. According to the US Drought Monitor, in eastern Texas and Oklahoma widespread rain over a half inch fell this week. As a result, many areas from the Dallas-Fort Worth Metroplex and eastward along the Red River saw improvements to ongoing drought and dryness. Improvements also occurred in south Texas. In parts of southwest Texas that did not see rain, some worsening of drought conditions occurred, due to increasing precipitation deficits and lessening soil moisture. Hay is beginning to move more as producers are stocking up for winter. However, a lack of trucks and increased trucking prices have slowed down movement some.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.

*** The next report release will be November 26th***

Central						
Hay (Conventional)						
Alfalfa - Premium/Supreme (Ask/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
