Production, Use and Value

Citrus production for the 1974-75 season was a record 14.6 million tons up 9 percent from last season. Records were set in 1974-75 for oranges, lemons, tangelos and tangerines, while production of temples and limes equaled previous records.

Orange production at 237.8 million boxes (10.2 million tons) was up 10 percent from last season. Grapefruit output however at 61.1 million boxes (2.5 million tons) was 7 percent less than 1973-74.

Processors used 70 percent of the 1974-75 citrus crop. They used 77 percent of the oranges, 54 percent of the grapefruit and 60 percent of the lemons compared with 79, 58 and 37 percent respectively in the 1973-74 season.

Florida accounted for 73 percent of the U. S. production of both oranges and grapefruit. California production represented 23 percent of the U. S. orange crop, 10 percent of the grapefruit, but continued as the principal producer of lemons.

Value of the 1974-75 citrus production at 968.6 million dollars was 5 percent more than the previous season.

The revised production and utilization estimates in this report are based on data available at the end of the marketing season from marketing agreement records, and processors. Allowances are made in addition for unrecorded local utilization and home use. Estimates for the California 1974-75 crop of Valencia oranges, grapefruit and lemons are preliminary as records are not yet complete for the marketing season.
