Cotton: World Markets and Trade

China: Surging Yarn Imports Will Constrain Cotton Import Demand

China, the world's largest importer of cotton, in recent months has been importing greater amounts of cotton yarn in response to high internal cotton prices. Similar increases have been seen in imports of cotton fabric and textiles. The stronger import demand for cotton yarn products will constrain cotton import demand, as cheaper imports substitute for domestic yarn. Yarn import levels this year, compared to the level over the last two years, is equivalent to an increase of about 2.0 million bales annually.

To date, India and Pakistan have been the primary beneficiaries of this shift. Their second quarter 2012 exports of cotton yarn to China more than doubled compared to the same period last year. The growth in yarn exports should boost demand for cotton in these countries' spinning sectors.

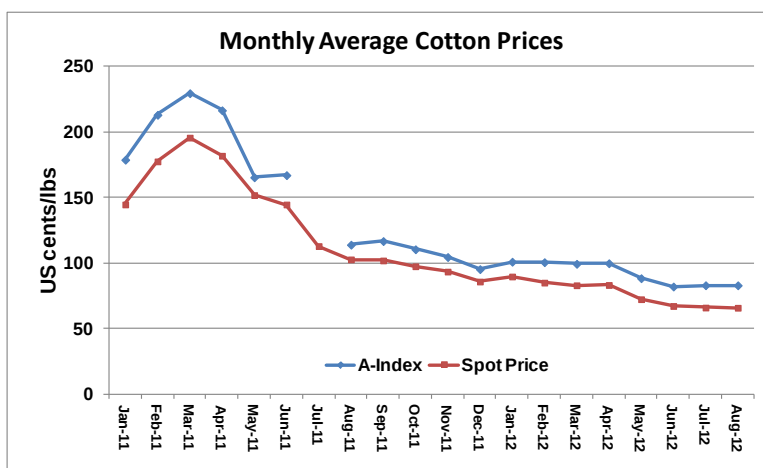

If China's demand for cotton yarn continues to expand, it could provide greater cotton yarn export opportunities for ASEAN countries, who recently signed a Free Trade Area Agreement with China. Imports account for 95 percent of ASEAN spinning use. Expanded ASEAN cotton consumption could ultimately benefit the U.S. which has historically had a 40 percent market share of the region's imports.

Overview

For 2012/13, world supply is raised slightly and consumption lowered, as a result ending stocks are raised. U.S. exports for 2011/12 are raised to reflect marketing year totals for export sales, adjusted for the net change in “on own account” exports. U.S. 2012/13 production is up, but exports are unchanged. The 2012/13 forecast season average US farm price is unchanged at 70 cents/pound.

Prices

The U.S. spot price and the A-Index continue to show little direction as the market awaits any signal from China concerning its import and reserve policies.
