Cotton: World Markets and Trade

Record Consumption in 2000/01 Fueled by Increases in Major Consuming Countries

Share of Total Increase in Consumption
For MY 2000/01 Over MY 1999/2000

World consumption for marketing year 2000/01 is forecast at 92.27 million bales up 1.43 million (1.6 percent) from the 1999/2000 marketing year estimate of 90.84 million bales. Increased consumption is forecast for nine of the top-ten consuming countries, except China. The increases in these nine countries account for 93 percent of the total increase in world consumption, but these countries only represent 57 percent of total consumption. Consumption in India, Pakistan, Turkey, Brazil, and Mexico are forecast to reach new record highs in 2000/01. Russia consumption is forecast at the highest level in seven years, while consumption in Indonesia is forecast to return to the record level seen in 1998/99. Consumption in the United States and the European Union, while not at record levels, are forecast up. China is the only top-ten consuming country not expected to see an increase in consumption, but it is expected to remain flat at its current record level.

U.S. COTTON OUTLOOK

The 1999/2000 season is unchanged from last month's estimate.

The 2000/01 forecast features higher production, exports and ending stocks. Production is projected at 19.3 million bales, up 300,000 bales, due to lower expected abandonment based on improved conditions thus far this season, especially in Texas. Exports are raised 200,000 bales as a result of larger U.S. production and higher import demand. These changes raise ending stocks marginally to 5.0 million bales, or about 27 percent of use.

WORLD COTTON OUTLOOK

The 1999/2000 world outlook features a decline in beginning stocks of 412,000 bales and a decline in production of 562,000 bales. Beginning stocks are reduced due to prior-year revisions for Argentina and Brazil. Production is reduced mainly in India and Turkey.

The 2000/01 world forecast has slightly higher production, consumption, and trade, and lower beginning and ending stocks. A slight increase in total foreign production of 67,000 bales, coupled with the increase in the U.S. forecast increased world production to 87.37 million bales. This month's projections of foreign consumption and trade reflect additional country-specific information. Consumption is forecast up 268,000 bales at 92.27 million bales. With consumption far in excess of production, world ending stocks are projected at 4.7 million bales below the beginning level; nearly all of the decline is forecast to occur in China. On a month-to-month basis, ending stocks are reduced 0.94 million bales, due mainly to lower beginning stocks.

COTTON PRICES

Cotlook A Index: The A-Index, a principal measure of international cotton prices, is an average of the five lowest quotes of cotton for delivery to Northern Europe ports. During June, quotes of Australian, Syrian, Paraguayan, Uzbekistan, and African 'Franc Zone' cotton were included in the Index. The Index averaged 59.54 cents per pound during the period, a 0.99-cent decrease from May's 60.53 cents per pound average. The African "Franc Zone" quote was the lowest in the Index over the four-week period, averaging 57.98 cents per pound. On June 29, the A-Index was 58.35 per pound, a decrease of 1.70 cents from last month's close of 60.35 cents per pound. The price decrease was caused in part by speculative sales and beneficial rains for planting in the U.S. south cotton belt and an anticipated increase in U.S. plantings.

Futures Prices: United States cotton futures prices represent the current price of U.S. cotton for delivery at a future date. Futures prices in June weakened in comparison to May's prices due partly to speculative trading and beneficial rains in the south. On Thursday, June 29, the July 2000 contract settled at 52.30 cents per pound, a decrease of 5.89 cents from the previous month's average. The October 2000 contract settled at 56.10 cents per pound, with a decrease of 4.63 cents from the previous month.

U.S. COTTON HIGHLIGHTS

Cotton Consumption: The seasonally adjusted daily rate of U.S. cotton consumption in May amounted to 38,224 (480-lb.) bales, compared with April's level of 38,878 bales. A total of 795,510 bales were consumed during the four weeks in May, compared with 800,312 bales in April (4 weeks). The seasonally adjusted annualized consumption rate for the month of May was 9.98 million bales, down from April's 10.15 million bales.

Domestic mills purchased a light to moderate volume of current-crop cotton for prompt and nearby delivery. Interest was best for color 42 and lower, staples 32 and 33, mike 35-49. A very light volume of 2000-crop cotton was scheduled for delivery in September 2000 through July 2001 delivery. Demand was good for color 41 and better, leaf 4 and better, staple 34 and longer, mike 35-47. Most mills have completed new crop purchasing and will reevaluate needs later this year. Interest was very good for ring-spun yarns and moderate for open-end yarns. Demand was very good for fine count yarns and good for coarse count yarns. Mill sales of sales yarn, upholstery and industrial fabrics were good; and sales of specialty yarn, greige cloth and print cloth were moderate. Most sales of domestic denim fabrics continued to improve. Most mills operated a six-day workweek.

Cotton Stocks: U.S. cotton stocks on hand in consuming establishments at the end of May totaled 486,617 bales (480-lb.), down from 495,973 in April. Stocks held in public storage and compresses in May totaled 5.4 million bales, down from 6.7 million bales in April. Active spindles in May totaled 4.42 million, of which 2.44 million were dedicated to 100 percent cotton, compared with 4.67 million for the same month last year, during which 2.5 million were dedicated to 100 percent cotton. Cotton's share on the cotton spindle system was 76.9 percent in May.

U.S. cotton exports in April 2000 totaled 708,000 (480-lb.) bales, 270,000 bales below March 2000 exports of 978,000 bales and 539,000 bales above April 1999 exports of 169,000 bales, according to the U.S. Bureau of the Census. The leading markets in April were Turkey, Mexico, Taiwan, Indonesia, and Hong Kong, with modest exports to Brazil and Canada.

U.S. cotton imports in April 2000 totaled 8,200 (480-lb.) bales, down, 5,600 bales from March 2000 when 2,600 bales were imported, and 111,300 bales less than April 1999 imports of 119,500 bales. The major supplier in April 2000 was Egypt, with very modest imports from Mexico.

U.S. Cotton Exports to Western Hemisphere Grows; Increased Domestic Consumption in 2000/2001 Forecast

By Andy Levin

U.S. cotton exports to the Western Hemisphere have exceeded 2.5 million bales, and with another month remaining in the 1999/2000 marketing year, are likely to exceed the previous record of 2.6 million bales set two years ago.

Export growth in the region has been particularly strong in Brazil, Columbia and Mexico; U.S. exports to these three countries are up approximately 500,000 bales or 25 percent from two years ago.

Demand in the Western Hemisphere is forecast up about 500,000 bales in 2000/2001, with major increases in Brazil (+250,000), Mexico (+100,000) and the United States (+100,000).

Increased demand in Brazil has been fostered by devaluation of the Real, which increased the competitiveness of domestic textile companies and reduced textile imports. The value of the Real fell about 60 percent in the beginning of 1999. In 1999, cotton yarn exports increased 65 percent compared to 1998.

Note on Revised Table 3.

This month, *Table 3, FY 2000 GSM-102 and Supplier Credit Programs*, was revised to focus it more on cotton and cotton products. Complete details of the various USDA export programs, including the GSM 102 Program and the Supplier Credit Guarantee Program, can be found on the FAS website at <http://www.fas.usda.gov/export.html>.

The first revision to Table 3 is that the only countries listed are those which are currently eligible for the Credit Guarantee programs and where the programs have been utilized for cotton or cotton products in any of the last three fiscal years. Second, the data for Cotton, Cotton Yarn and Cotton Fabric have been aggregated. At the current time there are no registrations for either Cotton Yarn or Cotton Fabric. If such activity were to occur, it would be noted in the table. Third, the table has been revised to show the monthly activity for the last six months.

Internet Release of Tables 3, 7-A1, 7-A2, 7-B and 8.

Table 3 presents monthly summaries of activity under the GSM 102 and the Supplier Credit Guarantee Programs. In order to facilitate more timely distribution of this information, updated versions of Table 3 will be placed on the FAS website as soon as the data are available rather than waiting until the publication of this circular.

Tables 7-A1, 7-A2, 7-B present monthly summaries of U.S. imports and exports which are derived from U.S. Census data. In order to facilitate more timely distribution of this information, updated versions of these tables will also be placed on the FAS website as soon as the data are available rather than waiting until the publication of this circular. This month's circular includes

trade data for April 2000. The April 2000 data was released by U.S. Census on June 20th, too late for the June circular. Starting with the release of May 2000 data, on about July 20th Tables 7-A1, 7-A2, 7-B will be updated and made available on the FAS website prior to their publication in the August Circular.

1/ Includes Cotton, Cotton Yarn, and Cotton Fabric.

2/ Total Cotton Registrations includes registrations and/or cancellations from Oct 1, 1999.

3/ Net registrations for period ending.

4/ Number in parenthesis in maximum term in months.

5/ Bolivia, Chile, Colombia, Ecuador, Peru, and Venezuela.

6/ Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

7/ Korea has a total Credit Guarantee \$575 million of which \$75 million is allocated specifically for Cotton

8/ Repayment terms are 180 days.

9/ Estonia, Latvia, and Lithuania

NOTES:

* First registration of cotton for fiscal year

Registrations current as of June 30, 2000.

July-2000

* Loss for countries outside of the United States reflects cotton lost or destroyed while in the marketing channel. For the United States, loss reflects the difference between stocks as reported by the Bureau of the Census and implicit stocks based on supply plus total use. A negative "loss" is a positive number.

* Loss for countries outside of the United States reflects cotton lost or destroyed while in the marketing channel. For the United States, loss reflects the difference between stocks as reported by the Bureau of the Census and implicit stocks based on supply plus total use. A negative "loss" is a positive number.

* Loss for countries outside of the United States reflects cotton lost or destroyed while in the marketing channel. For the United States, loss reflects the difference between stocks as reported by the Bureau of the Census and implicit stocks based on supply plus total use. A negative "loss" is a positive number.

Table 8: U.S. Export Sales Summary ^{1/}

U.S. export sales were up in June 2000. Upland cotton sales for delivery in MY 1999/2000 during June 1 - 29 (4 weeks) registered net sales of 138,700 running bales, a weekly average of 34,675 bales. In MY 1998/99, upland sales during June 3 - July 1, 1999, registered net sales of 155,200 running bales, a weekly average of 31,040 bales. The weekly upland export average through June 29 for MY 1999/2000 was 118,850 running bales against MY 1998/99's weekly export average of 73,750 running bales. Accumulated exports through June 29 for MY 1999/2000 were 5.7 million bales, compared with 3.5 million bales last year. Total upland outstanding sales for MY 1999/2000 were 1.13 million running bales, compared with .663 million bales the same time a year ago. Upland commitments to date were 6.8 million running bales, compared with 4.2 million bales last year. Pima export sales during June 1 - June 29 for delivery during MY 1999/2000 totaled 34,500 running bales and total net sales were 30,900 running bales. Pima accumulated exports through June 29 for MY 1999/2000 totaled 381,400 running bales, compared with 257,800 running bales the same time a year ago. Total Pima commitments amounted to 484,300 running bales.

1/ Reflects only trade among the 12 countries of the former Soviet Union and three Baltic States.

2/ Reflects NIS trade with external trading partners.

3/ Estimate.

4/ Projection.

Notes:

A: Adding internal and external trade will provide a total trade figure.

B: Ending stocks may include any loss that has occurred.

C: The NIS includes: Armenia, Azerbaijan, Byelarus, Estonia, Georgia, Kazakstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.
