This month USDA substantially revised the import and consumption estimates for Bangladesh for the period 2003/04 to 2009/10. The revised estimates are based on a review of data from the Central Bank of Bangladesh (CBB) and the Bangladesh Bureau of Statistics (BBS). Recently available data from other sources, both public and private, confirm the higher estimates for imports and consumption. The new USDA estimates indicate that imports and consumption grew at average annual rates of nearly 15 percent during the period, while the previous estimates indicated that the growth rates were about 10 percent. The cumulative impact of the stronger imports and the resulting increases in exports has meant a drawdown in global stocks.

## Prices

World prices have trended slightly upward as the market waits for further signs that demand is improving.

U.S. prices have continued to rise in recent weeks. Although, much of the increase continues to be attributed to the weakening of the US dollar, uncertainty about the size and condition of the U.S. crop has also helped sustain the upward trend in prices.
