

Cattle on Feed

Released July 25, 2008, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Cattle on Feed* call Jason Hardegree at (202) 720-3040, office hours 7:30 a.m. to 4:00 p.m. ET.

U.S. Cattle on Feed Down 4 Percent

Cattle and calves on feed for slaughter market in the United States for feedlots with capacity of 1,000 or more head totaled 10.3 million head on July 1, 2008. The inventory was 4 percent below July 1, 2007 and 5 percent below July 1, 2006. The inventory included 6.43 million steers and steer calves, down 5 percent from the previous year. This group accounted for 62 percent of the total inventory. Heifers and heifer calves accounted for 3.82 million head, down 3 percent from 2007.

Placements in feedlots during June totaled 1.51 million, 9 percent below 2007 and 22 percent below 2006. Net placements were 1.45 million head. During June, placements of cattle and calves weighing less than 600 pounds were 365,000, 600-699 pounds were 325,000, 700-799 pounds were 383,000 and 800 pounds and greater were 440,000.

Marketings of fed cattle during June totaled 1.97 million, 8 percent below 2007 and 10 percent below 2006. This is the lowest fed cattle marketings for the month of June since the series began in 1996.

Other disappearance totaled 60,000 during June, 15 percent above 2007, but 5 percent below 2006.

U.S. All Cattle on Feed Down 5 Percent

Cattle on feed July 1, 2008, from all feedlots in the United States, totaled 11.7 million, down 5 percent from the 12.3 million on July 1, 2007 and down 6 percent from July 1, 2006. Cattle on feed in feedlots with 1,000 or more head accounted for 88 percent of the total cattle on feed on July 1, 2008, up 1 percent from July 1, 2007.

¹ Cattle and calves on feed are animals for slaughter market being fed a ration of grain or other concentrates and are expected to produce a carcass that will grade select or better.

Terms and Definitions of Cattle on Feed Estimates

Cattle on feed are animals being fed a ration of grain, silage, hay and/or protein supplement for slaughter market that are expected to produce a carcass that will grade select or better. It excludes cattle being "backgrounded only" for later sale as feeders or later placement in another feedlot.

Placements are cattle put into a feedlot, fed a ration which will produce a carcass that will grade select or better, and are intended for the slaughter market.

Marketings are cattle shipped out of feedlots to a slaughter market.

Other disappearance includes death loss, movement from feedlots to pasture, and shipments to other feedlots for further feeding.

Reliability of Cattle on Feed Estimates

Survey Procedures: During January and July all known feedlots in the U.S. with capacity of 1,000 or more head are surveyed to provide data for cattle on feed estimates. During the other months, all known feedlots from 17 States are surveyed. The 17 States account for 98 percent of the cattle on feed in feedlots with capacity of 1,000 or more head.

Estimating Procedures: These cattle on feed estimates were prepared by the Agricultural Statistics Board after reviewing recommendations and analysis submitted by each State office. Regional and State survey data were reviewed for reasonableness with each other and with estimates from the previous month when setting the current estimates.

Revision Policy: Revisions to previous estimates are made to improve month to month relationships. Estimates for the previous month are subject to revision in all States each month when current estimates are made. In February, all monthly estimates for the previous year, and the number of feedlots and annual marketings from two years ago are reviewed and subject to revisions. The reviews are primarily based on slaughter data, state check-off or brand data, and any other data that may have been received after the original estimate was made. Estimates will also be reviewed after data from the Census of Agriculture are available. No revisions will be made after that date and estimates become final.

Reliability: Since all 1,000+ capacity cattle on feed operators in every State are not included in the monthly survey, survey estimates are subject to sampling variability. Survey results are also subject to non-sampling errors such as omissions, duplications, and mistakes in reporting, recording, and processing the data. The effects of these errors cannot be measured directly. They are minimized through rigid quality controls in the data collection process and through a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of estimates in this report, the "**Root Mean Square Error**" is shown for selected items in the following table. The "Root Mean Square Error" is a statistical measure based on past performance and is computed using the differences between first and latest estimates. The "Root Mean Square Error" for cattle on feed inventory estimates over the past 24 months is less than 0.1 percent (0.04). This means that chances are 2 out of 3 that the final

estimate will not be above or below the current estimate of 10.3 million head by more than 0.04 percent. Chances are 9 out of 10 that the difference will not exceed 0.1 percent.

The following table also shows a 24 month record of the range of differences between first and latest estimates for selected items. Using estimates of number on feed as an example, changes between the first estimate and the latest estimate during the past 24 months have averaged 2,000 head, ranging from 0 to 18,000 head. During this period the initial estimate has not been above the final estimate, but has been below the final estimate 4 times. This does not imply that the initial estimate is likely to underestimate or overstate final inventory.

Reliability of Monthly Cattle on Feed Estimates¹

Item	Root Mean Square Error	90% Confidence Level		Difference Between First and Final Estimates ¹			Number of Months	
		Percent	(000) Head	Average	Smallest	Largest	First Above Final	First Below Final
