TURKEY CROP ABOVE LAST YEAR

Turkeys raised in 1964 are expected to total 98.7 million birds, 6 percent above last year's crop, according to the Crop Reporting Board. The number of heavy white breed turkeys being raised is up 20 percent, light breeds are up 14 percent, but bronze and other heavy breeds are down 5 percent. Increased production of turkeys is expected in all regions of the country except the West. Increases are 20 percent in the South Atlantic, 10 percent in the South Central, 7 percent in the West North Central, 3 percent in the North Atlantic and 2 percent in the East North Central. The West is expected to have a 2-percent decrease.

Heavy breed turkeys raised this year are expected to total 87.7 million compared with 83.7 million last year. Heavy preeds are up 17 percent in the South Atlantic Region, 9 percent in the South Central, 8 percent in the West North Central, and 4 percent in the East North Central. Decreases are 4 percent in the West and 3 percent in the North Atlantic. The heavy white turkey crop of 38.7 million is 44 percent of all heavies compared with 38 percent in 1963. Increased heavy white production is indicated in all regions except the North Atlantic. Increases are 89 percent in the South Central, 25 percent in the South Atlantic, 20 percent in the West, 15 percent in the West North Central, and 11 percent in the East North Central. Heavy white production in the North Atlantic shows a 1-percent decrease.

The number of other heavy breed turkeys raised, at 49.0 million birds, is 5 percent below the 51.5 million raised in 1963. Increases in other heavies are 9 percent in the South Atlantic Region and 3 percent in the West North Central. Decreases are 15 percent in the South Central, 10 percent in the East North Central, 9 percent in the West and 5 percent in the North Atlantic.

The number of light breed turkeys being raised totals 11.0 million, compared with 9.7 million in 1963. Increases in light breed production are 94 percent in the North Atlantic States, 59 percent in the West and 26 percent in both the South Atlantic and South Central. Decreases are 9 percent in the East North Central and 4 percent in the West North Central.

California, the leading State, will raise 15.6 million turkeys in 1964, followed by Minnesota with 15.3, Iowa with 8.2, Missouri with 6.5, and Wisconsin with 5.2 million.

Turkey poult hatch September 1963 through July 1964 was 5 percent above the same period a year earlier. The largest percentage increase occurred during the September 1963-January 1964 period when the seasonal hatch is small. Turkey-feed price ratios have been below a year earlier for each month since October 1963 except for January and July 1964, when they were the same as the previous year. Prices received by producers for live turkeys have been below the same month a year earlier for every month since February 1964.

In this report light breed turkeys include Beltsville small white, Jersey Buff, Royal Palm and wild turkeys; heavy breed turkeys include heavy white, bronze, other heavy breeds and crosses with light breeds.
