Cheese production is trending steady to lighter throughout the U.S. Milk handlers in the East note tightening milk volumes and increases in Class I demand, which has limited the amount of milk available to cheese manufacturers. Foodservice demand is steady while retail demand has increased week over week. Cheese producers in the Central region report tight spot milk availability with estimations that spot milk prices will remain above Class III until around Labor Day. Regional demand for cheese is steady. Cheese inventories vary from manufacturer to manufacturer. Cheese production in the West is active. Milk availability remains tight in the region, but some manufacturers relay there is enough for processing. Cheese demand is steady to stronger, namely as educational institutions reopen. Cheese inventories are mixed.

Information for the period August 12 - 16, 2024, issued weekly
