CATTLE AND CALVES ON FEED

Selected States, by Quarters, 1955-59, Revised Estimates
Number on Feed, Classes, Weight, Time on Feed
Marketings-Placements

This report presents, by States, revised estimates of the number of cattle and calves on feed for market by quarters for 1955-59. Detailed data showing the number on feed by classes, by weight groups, by length of time on feed groups, and data on marketings and placements are also included.

Monthly estimates of cattle and calves on feed for Arizona and California are shown beginning July 1, 1959 when the monthly program was started.

The program of quarterly estimates of cattle on feed was started in 3 States (Illinois, Iowa, and Nebraska) in 1948--in Idaho in 1950 (January 1 and April 1 only) and in California in 1953. Beginning in 1954, 6 additional States were added to quarterly program. See AMS bulletin 147 dated October 1956 for 1950-54 estimates.

During the period January 1, 1955 through July 1, 1958 there were 13 States included in the year-around quarterly program. In addition, estimates were made for Idaho January 1 and April 1, 1955-58 and for Oklahoma January 1 and April 1, 1958. On October 1, 1958, an additional 6 States plus Idaho and Oklahoma were added to the quarterly cattle on feed program bringing the total to 21 States. The quarterly program was increased to 26 States October 1, 1959 with the addition of Wyoming, New Mexico, Nevada, Washington, and Oregon. Estimates of cattle on feed on January 1 were made for each of the 26 States not in the quarterly program the full 5 years.

The grouping of cattle and calves on feed by classes was changed and weight breakdowns by classes were started beginning October 1, 1958.

Estimates relate to cattle and calves being fattened for slaughter market on grain or other concentrates which are expected to produce a carcass that will grade good or better.

The cattle on feed estimates for 1955 through 1959 have been revised for some States in conjunction with the 5-year revision program for all cattle and calves. No data on cattle on feed were available from the 1959 Census of Agriculture. Marketing data and other information which became available after the original estimates were made necessitated revising cattle on feed estimates for some States for all or portions of the 1955-59 period.

Items blank for certain States in the following tables mean that data are not available.
