OCCUPANCY OF PUBLIC-COLD STORAGE WAREHOUSES, 1946-51

311162

COLD STORAGE REPORT

Analysis of space and holdings, December 31, 1950

[Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants. Commodities in space owned or leased and operated by the armed services are not reported. All December 31 figures are preliminary.]

Storage occupancy

The seasonal decrease in the utilization of cooler space during December was slightly less than average. On December 31 coolers were 67 percent occupied, a decrease of 4 points since November 30. The average December decrease in cooler space occupancy was 5 points. The East South Central Region was the only area showing an increase in the use of cooler space, while occupancy in the West South Central Region remained unchanged from the preceding month. All other regions showed decreases of 3 to 6 points. Public freezer occupancy, up 2 points from November 30, equaled the average December 31 occupancy level of 81 percent. A year ago this time freezer space was 76 percent occupied. Decreased utilization of space during December took place in the Middle Atlantic, East South Central, West South Central, and Pacific Regions. Freezer occupancy increases in the remaining areas ranged from 5 to 11 points. Freezer space in the majority of key cities was filled to near capacity on December 31, however, only in Detroit, St. Louis, and Nashville was cooler space above 80 percent occupied.

General commodity movement

The total weight of cooler and freezer items in storage December 31 totaled 5 billion pounds. Cooler commodities at 2.9 billion pounds were almost a half billion pounds below November 30 stocks, while freezer items amounting to 2.1 billion pounds were about 100 million pounds above November 30 holdings. The net decrease in weight of both cooler and freezer foodstuffs during December was about 300 million pounds. The removal of fresh apples from storage remained the main contributing factor to the net decrease in cooler weights. The into-storage movement of frozen pork played a similar role in accounting for the net increase in the weight of freezer commodities.

Fruits and vegetables

Seasonal withdrawals during December of 6 million bushels of fresh apples left 34 million on hand which was an all-time high for any December 31 on record. Stocks of pears were reduced to 1.6 million bushels, reflecting a net decrease of 600,000 bushels during December. Net withdrawals of frozen fruits during the month were almost twice the average December seasonal reduction. Stocks were down 33 million pounds from a month earlier and totaled 446 million pounds. This compares with 300 million pounds in store last year and average December 31 inventories of 370 million pounds. All frozen fruit items except apples and miscellaneous fruits reflected seasonal net reductions during December, the greatest being reported in stocks of strawberries, orange juice, and cherries. For this time of year, however, holdings of grapes and strawberries were at new highs, with 30 and 97 million pounds, respectively, in store. Frozen vegetables, too, were being moved from storage in greater than average amounts. The 29 million pound net decrease last month compares with an average 20 million pound December seasonal withdrawal for the 5-year period ended 1949. Despite greater than average net withdrawals, stocks of all frozen vegetable items except asparagus, cauliflower, spinach, pumpkin, and squash were at an all-time December 31 high.

CORRECTION

March 31, 1952 Cold Storage Report should be corrected as follows:

Table 15 - Page 16

PORK

Frozen pork.....	556,523
Total pork.....	819,209

OTHER MEATS AND MEAT PRODUCTS

Frozen lamb and mutton.....	13,723
Frozen veal.....	11,922
Total other meats.....	163,242

Table 17 - Page 19

Veal frozen - East North Central.....	2,269
Pork, frozen - East North Central.....	169,739
Pork, frozen - East South Central.....	13,147
Lamb and mutton, frozen - East South Central.....	121

Dairy and poultry

National holdings of butter dropped to 105 million pounds by December 31, thus reflecting a net withdrawal of 55 million pounds since November 30. This seasonal reduction compares with 16 million pounds withdrawn from store last year and 27 million pounds, the average December net decrease during the 5-year period ended 1949. Although current stocks were below last year's holdings, they were more than twice the December 31 average American cheese holdings of 189 million pounds were still at a record December 31 high despite net withdrawal of 45 million pounds during the month. The 26,000 cases of shell eggs in storage were the lowest for any December 31 on record. Frozen egg supplies were down to 49 million pounds which compares with 54 million pounds in storage last year and 106 million pounds average December 31 holdings. Seasonal increases in poultry stocks during December were about average with a net increase of 12 million pounds. National holdings totaled 282 million pounds which were below average and the holdings of last year. The greatest seasonal gains were reported in stocks of fryers, roasters, and turkeys. These poultry items totaled 22, 20, and 112 million pounds respectively, on December 31.

Meats and meat products

National holdings of all classes of meats in storage amounted to 791 million pounds by December 31 as almost a quarter billion pounds of meats moved into storage during the month. Commodity-wise, beef stocks totaled 145 million pounds. This compares with 121 million pounds stored this time last year. Pork at 518 million pounds reflected a seasonal net increase of 192 million pounds. Frozen pork stocks more than doubled since November 30 and by the end of last month totaled 296 million pounds which was 55 million pounds greater than last year's supply. Lard and rendered pork fat holdings were up 13 million pounds since November 30 and amounted to 71 million pounds by the end of last month. This seasonal increase was some 20 million pounds less than last year but total holdings were only 3 million pounds below last year's supply.

Fishery products

A seasonal decrease of 7 million pounds during December brought national holdings of frozen fishery products down to 159 million pounds by the end of last month. This compares with 147 million pounds in store last year and average December 31 stocks of 145 million pounds. Cured fishery products totaled 22 million pounds which was slightly above average for this time of year.

Storage outlook

Public cooler occupancy in its second month of a seasonal decline dropped only 5 percentage points since the peak on October 31 last. In the corresponding period for the 5 years ended 1949, the seasonal decline was 7 points. Cooler-held commodities such as apples and cheese still are at unseasonably high levels and so occupancy by the end of this month may not drop as much as the 5-year average would indicate, which normally is a 3-point decrease during January. Freezer occupancy moved upward during December by 2 points and was undoubtedly at its peak with 81 percent occupancy. According to past performance, however, this month's freezer occupancy should decline about 1 point as seasonal withdrawals of freezer-held commodities gets under way during January.

Total.....	"	128,268	232,830	294,002	190,030

1/ Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, the armed services, and other Government agencies. In addition to stocks reported above, the armed services hold some stocks in space owned and operated by them on which figures are not available. Current figures not entirely comparable with 5-year average.

2/ Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month.

Total, all fish.....	164,948	167,280	186,777	180,409

1/ Data furnished by the Department of the Interior, Fish and Wildlife Service, which publishes a report giving detailed information, species, and geographical sections.

Table 15. — Meats and meat products

Net changes in stocks during December and comparisons --

Beef: Increased by 33 million pounds; December 1949 increase was 30 million pounds; average December increase was 34 million pounds.

Pork: Increased by 192 million pounds; December 1949 increase was 177 million pounds; average December increase was 142 million pounds.

Other meats: Increased by 27 million pounds; December 1949 increase was 26 million pounds; average December increase was 27 million pounds.

Lard: Increased by 15 million pounds; December 1949 increase was 34 million pounds; average December increase was 33 million pounds.

Stocks of meats and meat products	' Dec. 31 ' 1945-49 av. '	' Dec. 31 ' 1949 '	' Nov. 30 ' 1950 '	' Dec. 31 ' 1950 '
