COLD STORAGE REPORT

AS OF NOVEMBER 1, 1939

Reports from warehouses indicate that the quantity of apples moved into cold storage by November 1 was less than that for the same date a year earlier and also less than the 5-year (1934-38) average for November 1. Stocks, which totaled 28,605,000 bushels, were 1,665,000 bushels below those of November 1, 1938, and 1,233,000 bushels below the average.

Continued heavy reductions in stocks of creamery butter during October are apparent. Withdrawals totaling nearly $26\frac{1}{2}$ million pounds compare with about $15\frac{1}{2}$ million moved from storage during the same period of 1938 and 16 million for the 5-year average.

Net withdrawals of all varieties of cheese totaled slightly less than 2 million pounds. During October 1938 nearly $8\frac{1}{2}$ million were removed from storage and the 5-year average shows a reduction of nearly $4\frac{1}{2}$ million.

The out-of-storage movement of eggs during October was slightly above average. Net withdrawals of the equivalent of 2,393,000 cases compares with 1,977,000 cases a year earlier and 2,248,000 for the 5-year average. Shell eggs were withdrawn to the extent of 1,902,000 cases compared with 1,521,000 cases for October 1938 and 1,866,000 for the 5-year average, and frozen egg meats were reduced by 17,180,000 pounds compared with 15,939,000 pounds a year earlier and 13,371,000, the 5-year average. Total stocks of both shell and frozen eggs exceeded those of a year earlier by 570,000 cases but were 567,000 cases below the 5-year average.

Total stocks of all frozen fruits were reduced during the month by 117,000 pounds. This compares with a decrease of 3,733,000 for October a year ago. The 141,970,000 pounds on hand November 1, 1939, is 1,878,000 pounds less than the holdings reported for the same date last year.

Frozen vegetable stocks were decreased by 1,088,000 pounds, which compares with an increase of 139,000 pounds for October a year ago.

Holdings of all varieties of frozen poultry were increased during the month by 16,118,000 pounds, which is slightly below normal. A year earlier the into-storage movement was 17,750,000 and the 5-year average in-movement 17,340,000 pounds.

Total stocks of frozen and cured meats were reduced by $16\frac{1}{2}$ million pounds. A year earlier the reduction was $23\frac{1}{2}$ million and the 5-year average $6\frac{1}{4}$ million pounds. November 1, 1939, holdings exceeded those of a year earlier by nearly $37\frac{1}{2}$ million pounds but were about $82\frac{1}{2}$ million pounds below the 5-year (1934-38) average.

Lard stocks were reduced by $10\frac{1}{2}$ million pounds. This compares with decreases of $22\frac{1}{4}$ million and 18 million pounds for November 1, 1938, and the 5-year average, respectively.

FRUITS AND VEGETABLES

FRESH FRUITS

Cold storage holdings of apples reported were the equivalent of 28,605,000 bushels. This quantity is 1,665,000 bushels less than reported for November 1, 1938, and 1,233,000 bushels less than the 5-year (1934-38) average for November 1.

Total stocks of all varieties of pears were 2,729,000 boxes and baskets. This quantity compares with 3,294,000 boxes and baskets on hand a year earlier and a 5-year average of 2,373,000.

FROZEN FRUITS

Stocks of all frozen fruits reported totaled 141,970,000 pounds, a decrease during October of 117,000 pounds. Of the total November 1 holdings, 27,380,000 were reported as unclassified as to variety.

FROZEN VEGETABLES

During October frozen vegetable stocks were decreased by 1,088,000 pounds. A year earlier for the same period there was a slight increase. November 1 holdings were 5,781,000 pounds heavier than a year earlier. Of the total quantity reported (77,172,000 pounds), 4,666,000 were unclassified.

Contents of November 1 Cold Storage Report

Separate tables appearing in this report show United States stocks on hand on November 1, this year compared with previous periods, for the following groups of commodities:

Fresh Fruits and Frozen Fruits and Vegetables, page 3;

Dairy and Poultry Products, page 4;

Meats (cured and frozen) and Lard, page 5.

Special tables of cold storage holdings are included for cream, butter, American cheese, eggs and poultry, by States, page 6; apples and pears, by States, and frozen fruits, by container-size, page 7; and November 1, 1939, data for all commodities, by geographic regions, pages 8 and 9.

(11/13/39)

DAIRY AND POULTRY PRODUCTS

Page #4

Stocks of creamery butter were reduced during October by 26,447,000 pounds. During October a year ago the reduction was 15,440,000 and the October 5-year (1934-38) average 16,313,000 pounds.

Commercial stocks were decreased by 21,306,000 pounds, Federal Surplus Commodities Corporation and relief holdings by 2,871,000 pounds, and Dairy Products Marketing Association holdings by 2,270,000 pounds.

Total butter stocks on November 1, 1939, were 67,116,000 pounds below those of November 1, 1938, but 2,039,000 pounds in excess of the November 1 average. DPMA holdings were 15,679,000 pounds compared with 102,038,000 a year earlier, FSCC and relief stocks 5,549,000 compared with 9,627,000, and commercial stocks 106,919,000 pounds compared with 83,598,000.

American cheese stocks were decreased by 3,523,000 pounds during October 1939. This quantity compares with 8,072,000 pounds net withdrawals during the same period a year earlier, and 2,646,000 pounds for the 5-year average.

Total stocks of all varieties of cheese were 17,580,000 pounds below those of November 1, 1938, and 3,986,000 pounds below the 5-year average.

Total stocks of eggs -- both shell and frozen egg meats -- totaling the equivalent of 6,508,000 cases, were 570,000 cases in excess of a year earlier but 567,000 cases less than the 5-year average.

The seasonal into-storage movement of frozen poultry during the month indicated an increase in stocks of all varieties totaling 16,118,000 pounds. This quantity compares with a net into-storage movement of 17,750,000 pounds for October 1938 and a 5-year average in-movement of 17,340,000 pounds. Holdings exceeded those of a year earlier and the 5-year average by 1,590,000 and 2,194,000 pounds, respectively.

* Revised.

1/ Frozen eggs are converted on the basis of 35 pounds to the case.

2/ SPECIAL NOTE: 83 percent of total frozen eggs reported as of November 1, 1939, were classified as follows: Whites - 32 percent; Yolks - 21 percent; and Mixed - 47 percent.

MEATS AND LARD

Stocks of all frozen and cured meats, totaling 383 million pounds, exceeded those of a year earlier by approximately 37 $\frac{1}{4}$ million pounds but were about 82 $\frac{1}{2}$ million less than the 5-year (1934-38) average for November 1. Withdrawals during October were 16,500,000 pounds. During October 1938 the net out-of-storage movement was 23,529,000 pounds and the 5-year average 6,279,000 pounds.

Stocks of frozen and cured beef were increased by slightly more than 12,000,000 pounds compared with increases of 4,000,000 a year earlier and 13,000,000 for the 5-year average.

Frozen and cured pork stocks were reduced during the month by 27,500,000 pounds, which compares with a reduction of 25,500,000 for October 1938 and 21,000,000 for the 5-year average. Stocks on hand on November 1 were 21,000,000 greater than a year earlier but 51,000,000 below the 5-year average.

The out-of-storage movement of lard was somewhat reduced during October compared with the 2 preceding months. Net withdrawals totaled 10,658,000 pounds. This quantity compares with 22,279,000 moved during October 1938 and 17,929,000 pounds for the 5-year average.

Stocks on hand were only slightly (less than half a million pounds) above those of a year earlier. They were about 1 $\frac{1}{2}$ million pounds less than the 5-year average.
