[Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. All August 31, data are preliminary.]

# PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

## COLD STORAGE REPORT, SEPTEMBER 1, 1962

### Commodity summary

Gains in cooler and freezer stocks raised the total refrigerated product weight to 5.6 billion pounds on September 1, a new high for the date. These stocks are 8 percent greater than a year earlier and 19 percent greater than the September 1, 1957-61 average. Frozen fruit holdings moved up seasonally but by a lesser amount than a year earlier and the average. The September 1 stocks of 562 million were 52 million pounds more than the previous month's total. Supplies for this time of year are about 4 percent below September 1, 1961 but 4 percent above average for the date. Frozen vegetable stocks advanced 141 million pounds during the month to 1,096 million pounds on September 1. The August gain was less than a year earlier and average. Holdings were 2 percent under those of September 1, 1961 but 23 percent greater than average. Orange concentrate holdings were reduced seasonally. A reduction of 8 million gallons left 56 million in storage compared with 37 million gallons held this time last year and 33 million, the average for September 1. Government-owned butter totaled 405 million pounds out of the 457 million pound total stored on September 1. American cheese stocks, at 481 million pounds, were 7 percent larger than a year earlier and 28 percent greater than average. Net withdrawals from stocks of shell eggs and frozen eggs during August brought September 1 holdings of shell eggs down to 250,000 cases and frozen eggs to 120 million pounds. For this time of year, case egg holdings are only about one-third of average while frozen eggs are down 16 percent. Frozen poultry holdings increased 41 million pounds to 251 million by September 1. The August gain was 3 million less than average and 33 million short of a year earlier. Turkey holdings, at 160 million pounds, were one-third larger than average for September 1 but down 15 percent from a year earlier. Holdings of beef moved up 9 million pounds to 131 million, about 8 percent under average for the date and 22 percent under the September 1, 1961 level. Pork, at 178 million pounds, was down 56 million from a month earlier. Stocks, however, were above a year earlier and the average.

### Cooler and freezer stock changes

Cooler-room stocks were up to 1.8 billion pounds and freezer-room stocks advanced to 3.8 billion on September 1. Holdings in both cooler and freezer space were a record high for the date. Gains in stocks of cooler-held fruits, canned milk, and beef were sufficient to overcome seasonal withdrawals of fresh vegetables, dried and evaporated fruits, nuts, cheese, eggs, and pork. In freezers, increased holdings were reported for poultry, vegetables, fruits, and beef. There was a net out-movement from storage during the month for butter, cream, eggs, juices, and pork.

### Storage occupancy in public warehouses

Occupancy of both cooler and freezer space in public warehouses increased during August. Cooler occupancy, at 67 percent of usable capacity on September 1, was 3-percentage points above August 1. Freezer occupancy, at 74 percent, was up 1 point. Compared with September 1 last year, cooler occupancy was up 13 points but freezer occupancy was down 4 points. The September 1, 1957-61 average occupancy is 53 percent for coolers and 73 percent for freezers. The largest percentage increases in cooler occupancy during August were registered in the West North Central and Pacific Regions. The largest percentage increases in freezer occupancy were in the New England and Pacific Regions.

### Dairy and dairy products

A decline of 12 million pounds in butter holdings lowered stocks to 457 million pounds on September 1, compared with 256 million a year earlier and 182 million pounds, the average for the date. September 1 stocks were the largest for the date since 1954. Approximately 405 million pounds of the total stored were Government-owned compared with 178 million on September 1, 1961. American cheese stocks totaled 481 million pounds on September 1, a decline of 3 million from the previous month contrasted with the average increase of 8 million. A year earlier, stocks

totalled 448 million pounds and the September 1, 1957-61 average is 377 million pounds. Cream holdings declined seasonally. A reduction of 2 million pounds brought warehouse holdings down to 12 million pounds. This was about two-thirds the holdings on September 1, 1961, and about half the average.

#### Fruits, vegetables, and juices

September 1 holdings of frozen fruits totaled 562 million pounds, 4 percent larger than average but 4 percent lower than the stocks of a year earlier. During August, holdings increased 52 million pounds, 6 million short of average and only half as great as during August 1961. Stocks of blueberries, cherries, and peaches advanced more than any of the other fruit items during the month. Only apples, boysenberries, grapes, and strawberries were in smaller supply on September 1 than a month earlier. Holdings of strawberries, at 202 million pounds, were down 12 million from a year earlier, and 17 million from the average. Frozen vegetable holdings totaled 1,096 million pounds on September 1. This is 2 percent less than a year earlier, but 23 percent more than average. During August, vegetable stocks increased 141 million pounds compared with a 208 million gain during August 1961 and the average of 161 million pounds. The largest increase was 56 million pounds for regular cut snap-beans, which raised their stocks to 113 million pounds. Green peas were up 34 million pounds to 317 million. For the date, these supplies were 3 percent above a year ago, but about average for September 1. Orange concentrate holdings were down about 8 million gallons, leaving 56 million in storage. These supplies were 52 percent larger than on September 1, 1961, and 71 percent more than average for the date.

#### Poultry and poultry products

Holdings of all frozen poultry increased 41 million pounds to 251 million pounds on September 1. A year earlier, stocks totaled 318 million and the 5-year September 1 average is 229 million pounds. An August net increase of 37 million pounds brought September 1 turkey stocks to 160 million pounds. The August 1961 increase was 61 million pounds and the 1957-61 average gain is 32 million pounds. September 1 stocks of frozen eggs, at 120 million pounds, were down 3 million pounds from August 1. This time last year, stocks totaled 108 million; the average for the date is 143 million. Shell egg holdings at 250,000 cases were a record low for the date. Stocks were about 11 percent below holdings on September 1, 1961 (the previous record low for the date) and 64 percent below the average.

#### Meat and meat products

Warehouse holdings of red meats totaled 389 million pounds on September 1, a drop of 55 million pounds from August 1. This reduction compares with the decline of 54 million pounds during August last year and the 5-year average of 60 million pounds. September 1 stocks of cooler and freezer beef, at 131 million pounds were 22 percent below August 1961 and 8 percent below the 5-year average. A 56-million pound net reduction in total pork stocks brought September 1 holdings to 178 million pounds. This compares with a 52-million pound decline during August 1961 and the average reduction of 54 million. Frozen pork totaled 146 million pounds, a decline of 54 million pounds, while cooler pork, at 32 million pounds, was 2 million pounds less than on August 1. Red meats other than beef and pork totaled 80 million pounds, a decline of 9 million pounds from a month earlier.

1/ Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, the Armed Services, and other Government agencies. In addition to stocks reported above, Armed Services hold some stocks in space owned and operated by them on which figures are not available.

2/ Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month.

**TABLE 11.-- End-of-month space and occupancy in public general warehouses in selected cities**
