The bottom of the whey protein concentrate 34% (WPC 34%) price range moved higher. The WPC 34% mostly price series moved higher. Contacts have shared that demand for WPC 34% has increased sharply this week. Processors have prioritized building whey protein isolate and WPC 80% inventory in the past weeks and months, and contacts share WPC 34% inventories are tight. Market participants share different sentiments on spot load availability. Some share they have found loads of WPC 34% to purchase, while others relay there is little if any inventory to be found. Some contacts continue to share demand for liquid WPC is strong, with some processors noting they do not intend to dry much, if any, WPC 34% in Q4.
