CROP REPORTING BOARD

LIVESTOCK SLAUGHTER, BY STATES, 1953
REVISED MONTHLY ESTIMATES

May 1954

This report presents, by States and for the United States, revised monthly estimates of livestock slaughtered in commercial plants during 1953. This report includes monthly estimates of meat and lard production for the United States and monthly estimates by States for the number of head, average live weight per head, and total live weight of each species of livestock slaughtered. These estimates include slaughter in Federally inspected plants and in other wholesale and retail plants, but excludes farm slaughter.

The estimates in this report differ slightly from the current monthly reports issued in 1953. These revisions are based on a further review of current information and from additional data received from municipal and State inspection services in some States.

This report is made possible through the cooperative efforts of the Agricultural Research Service and the Agricultural Marketing Service.
