LIVESTOCK SLAUGHTER

Number and Live Weight, by States

Revised monthly estimates of livestock slaughtered in commercial plants during 1955, by States and for the United States, are presented in this report. The estimates include meat and lard production for the United States and the number, average live weight per head, and total live weight of each species of livestock slaughtered, by States. Slaughter in Federally inspected plants and in other wholesale and retail plants is included, but farm slaughter is excluded.

The estimates differ slightly from the monthly estimates issued in 1955. Revisions are based on a further review of current information and additional data received from municipal and State inspection services in some States. The number of livestock slaughter under Federal inspection is obtained from the Meat Inspection Branch, Agricultural Research Service.
