PROCESSING VEGETABLES

ANNUAL SUMMARY

1975

A total of slightly over 14.0 million tons were harvested in 1975 from the Nation's 13 major commercial processing vegetable crops. This tops last year's output by 12 percent and is 24 percent above the 1973 aggregate. Large increases in tonnage of four of these crops more than offset declines registered in the remainder.

Those crops showing production increases were: lima beans, up 7 percent; sweet corn, 15 percent; cucumbers for pickles, 13 percent; and tomatoes, 21 percent more. Reduced crop sizes are estimated for the following: snap beans, down 11 percent; beets, 4 percent; cabbage for kraut, 15 percent; green peas, 1 percent; spinach, 9 percent; asparagus, 29 percent; broccoli, 14 percent; carrots, 29 percent; and cauliflower, off 28 percent.

The value of 1975 processing vegetables is placed at just over $1.1 billion, 8 percent above 1974, in spite of reduced raw product prices for six of the crops.
