Beef, boneless. Includes all boxed boneless beef, such as ground beef, roasts, steaks, loins, strips, rounds, trimmings, etc. Excludes variety meats (edible offal), such as tongues, livers, hearts, kidneys, and other organs removed from slaughtered beef.

Beef cuts. Includes all boxed primal beef cuts, bone-in.

Orange juice concentrate. Adjusted to 42.0 degrees Brix equivalent (9.896 pounds per gallon).

Pork, boneless hams. Includes full ham, bone removed and individual muscles separated.

Pork, boneless loins. Includes pork tenderloins.

Pork, ribs. Includes spareribs and backribs.

Pork, trimmings. Includes 42% regular trimmings, 72% special trimmings, boneless picnic meat, jowls, neckbone trimmings, blade, cheek, head, and shank meat, etc. Packaged bacon, sausage, and processed items, such as hot dogs and luncheon meats, are not included.

Pork, other. Includes ears, tails, feet, neckbones and snouts.

Pork, variety meats. Includes tongues, kidneys, livers, stomachs, hearts, chitterlings, salivary glands, and other organs removed from slaughtered hogs.

Pork, unclassified. Includes product unable to be classified elsewhere in this report.

Methodology

Data in this report are end-of-month regional and United States totals of various food commodities stored in cold storage warehouses. Some figures have been revised from those published in the monthly "**Cold Storage**" report, primarily due to late reports or reporting and tabulation errors. Occasionally, new firms or established firms who have not been responding to our request for information, begin to report. This may cause a shift in the data, which is due to the change in the number of plants reporting rather than an actual change in the level of stocks reported.

During the year, questionnaires are mailed about the 24th of each month to all operators on the list of approximately 1,400 public and private cold storage warehouses. In addition, data are obtained from special surveys and other sources (State Departments of Agriculture, U.S. Apple Association, etc.). All survey data represent stocks as of the end of the month.

Data are collected monthly from warehouses artificially cooled to a temperature of 50 degrees Fahrenheit or lower, and whose food products are normally stored for 30 days or more. All food items in these facilities are reported regardless of the number of days stored at the time of the report. Also included are specialized storage facilities meeting the 30-day requirement, such as fruit houses, dairy manufacturing plants, frozen fruit, fruit juice, and vegetable processors, and poultry and meat packing plants. Excluded are stocks in space maintained by wholesalers, jobbers, distributors, chain stores, locker plants containing individual lockers, meat packer branch houses, and frozen food processors whose entire inventories are turned over more than once a month.

All commodities reported on the cold storage report are regardless of ownership or origin. NASS does not differentiate between commodities owned by manufacturer, producer, wholesaler, retailer, government owned, or domestically produced vs. imported.

Data for reporting firms are added to estimates for non-reporting firms to obtain regional and National totals. Estimates for non-reporting firms are obtained by multiplying the previous month's figure by a percent change from the previous month. The percent change is calculated for each item from totals of the current and previous month summed from firms that reported both months.

Data are revised the following month based on late reports or corrected data. Final figures are published in the annual summary.

Reports are received from 900 firms each month which represent about 70 percent of the total capacity. Firms that are not on the list or firms who have never reported are not represented in the data. Monthly data can vary due to different firms reporting month to month. Survey data are also subject to non-sampling errors such as omissions and mistakes in reporting and in processing the data. While these errors cannot be measured directly, they are minimized by carefully reviewing all reported data for consistency and reasonableness.
