	Page
Part I. Regional cold storage holdings by months --	
Fresh, dried, and canned fruits and vegetables.....	2-6
Nuts and nutmeats.....	6-8
Eggs: shell, frozen, and dried.....	8-10
Dairy products.....	11-15
Frozen poultry.....	15
Frozen fruits.....	16-22
Frozen vegetables.....	24-29
Meats and meat products.....	31-36
Part II. Monthly refrigerated storage occupancy --	
Cooler occupancy by States.....	37
Freezer occupancy by States.....	38
Cooler occupancy in key cities.....	39
Freezer occupancy in key cities.....	40
Part III. State holdings of dairy and poultry products by months--	
Butter.....	41
Shell eggs.....	42
Frozen eggs.....	43
American cheese.....	44
Poultry.....	45
Certain commodities held by the Government.....	46
Total weight of cooler and freezer commodities.....	46
Charts: Percentage distribution, by regions, of total cold storage holdings as of annual peak --	
Shell eggs.....	9
Frozen eggs.....	9
Creamery butter.....	13
American Cheddar cheese.....	13
Frozen fruits.....	23
Frozen vegetables.....	23
Total meats.....	30
Frozen poultry.....	30

Data for this report are collected from public, private,
and semiprivate warehouses, apple houses and meat-packing
plants. Commodities in space owned or leased and operated by
the armed services are not reported.

Summary of 1949 Cold Storage Holdings

STORAGE OCCUPANCY: Utilization of space in public cold storage warehouses during 1949 dipped toward prewar levels for both coolers and freezers. Average occupancy in cooler space for 1949 was 54 percent, the same as reported for 1941. Public freezer occupancy, at 66 percent, was one point above the 1940 level and five points below the 1941 level. Utilization of cooler space during 1949 ranged from a low of 48 percent (March 1) to a high of 68 percent (November 1) while freezers ranged from 59 (June 1) to 73 percent (December 1). Less than half of the nation's public cooler space was used for storage in March, April, and May. This was the first time since 1941 that such a low level was reported for three consecutive months. A record seasonal low since prewar years was also established in freezer space occupancy, when, on June 1, only 59 percent of freezer space was being used. Not since June 1, 1940, had freezer occupancy been at this low level. The nation's foodstuffs under refrigeration during 1949 averaged 4.3 billion pounds monthly. Total weight in storage was at a maximum on November 1 when 4.6 billion pounds were reported under refrigeration, which compares to the all time record high of 4.9 billion pounds reached on December 1, 1947. Public cold storage warehouses on November 1 held about half the total weight of foodstuffs under refrigeration, but more than 70 percent of the commodities in freezer storage were in public refrigerated facilities.

FRUITS AND VEGETABLES: Fresh apples in storage each month during the first half of 1949 were below the monthly average for the 5-year period ended 1948. The new crop, which moved into storage during September, raised first-of-the-month holdings to above average amounts during the remainder of 1949. At the peak—November 1—35 million bushels of apples were in storage, which compares with the record high of 36 million bushels reached on December 1, 1937. Fresh pears in storage during 1949 reached their maximum on September 1, with a total of 5 million bushels. Average first-of-the-month stocks in 1949 for frozen fruits were 304 million pounds. This compares with 323 million pounds reported in 1948 and the 5-year average monthly holdings of 312 million pounds. New highs were reached in 1949 in holdings of fruit juices, including purees, and raspberries. The former at its peak totaled 64 million pounds (June 1), while the latter amounted to 36 million pounds (September 1). There were less asparagus, brussels sprouts, sweet corn, green peas, pumpkin, and squash in storage during 1949 than a year ago. However, stocks of lima beans, snap beans, broccoli, cauliflower, and spinach were stored in greater quantity than in 1948.

DAIRY AND POULTRY PRODUCTS: Creamery butter in storage during all of 1949 exceeded 1948 monthly holdings. By October 1 stocks reached 154 million pounds compared to 98 million pounds, the peak of a year ago. American cheddar cheese stocks, slightly below last year's level at the start of the year, surpassed 1948 storage holdings during most of 1949. Shell egg holdings never went higher than 2.3 million cases during 1949 and were as low as 141 thousand cases. During all of 1949 frozen eggs in storage were below average and the stocks of the preceding year. Poultry in storage were at comparatively low levels until the last quarter of 1949. Poultry holdings increased sharply as turkeys moved into storage in significant amounts. Fowls also increased in large numbers and by December 1 about 262 million pounds of poultry were in storage.

MEATS AND MEAT PRODUCTS: Less meat and meat products were in storage during 1949 than a year earlier. Average first-of-the-month stocks amounted to 643 million pounds during 1949, whereas in the previous year the average was 733 million pounds. The most beef reported in storage during 1949 was 151 million pounds (February 1), about 25 million pounds less than last year. Pork holdings at the seasonal peak—611 million pounds—were 89 million pounds below the maximum reached in 1948. Lard and rendered pork fat in storage fell off sharply during the last half of 1949 when compared with the stocks of a year earlier. During this period (July - December) monthly stocks were about half the stocks of lard and rendered pork fat reported in storage for the comparable period in 1948.
