Frozen vegetables.....	22-29
Meats and meat products.....	29-36
Part II. Regional cold storage holdings, 1944-48 average by months --	
Fresh fruits, dried and evaporated fruits.....	37-38
Dairy products.....	38-40
Eggs and poultry.....	40-41
Frozen fruits.....	42-45
Frozen vegetables.....	45-49
Meats and meat products.....	50-53
Charts: Monthly percentage in cold storage stocks --	
Shell eggs.....	9
Frozen eggs.....	9
Total cheese.....	13
Creamery butter.....	13
Frozen fruits.....	23
Frozen vegetables.....	23
Frozen poultry.....	30
Total meats.....	30

Data for this report are collected from public, private,
and semiprivate warehouses, apple houses and meat-packing
plants. Commodities in space owned or leased and operated by
the armed services are not reported.

Summary of 1948 Cold Storage Holdings

Below average occupancy, and less foodstuffs in storage than last year, characterized refrigerated warehousing operations during 1948. Utilization of both coolers and freezers in public cold storage warehouses averaged 5 points below the level of occupancy indicated for 1947. During 1948 average first-of-the-month occupancy for coolers was 65 percent while for freezers it was 75 percent. The 65 percent average monthly occupancy of coolers as reported for 1948 was the lowest since 1942, when the percentage was the same. Average monthly occupancy in freezers during 1948 also showed a tendency to drop below the wartime level but was 4 and 2 points, respectively, above the average for 1941 and 1942. Maximum space utilization for 1948 occurred on January 1, the reported occupancies being 74 percent for coolers and 85 percent for freezers on that date. Foodstuffs in storage during the year averaged 1.9 billion pounds for coolers and 1.6 billion pounds for freezers. At their peak, in January, cooler stocks totaled 2.8 billion pounds while freezer-held commodities totaled 1.9 billion pounds.

Fruits and Vegetables

The storage of 30 million bushels of fresh apples on January 1, 1948, was high for the year. Stocks on hand during the first half of the year exceeded the quantities reported for each corresponding month in 1947, but during the last quarter storage stocks fell far below those reported in 1947. Fresh pears at their October peak equaled 4 million bushels--3 million bushels below the corresponding peak in 1947. Frozen fruits in storage reached their highest level on September 1. Of the 372 million pounds of frozen fruits stored on that date, almost a third were frozen strawberries. Frozen vegetables reached their maximum holdings on November 1 with 312 million pounds. These stocks were below the 1943-47 average November stocks by 66 million pounds. Frozen lima beans in storage each month during 1948 exceeded all previous reported stocks since 1937.

Dairy and Poultry Products

Cream in storage during 1948 averaged 38 million pounds per month and at its peak on September 1 totaled 71 million pounds. Creamery butter stocks, at **very** low levels during the first 6 months of the year, moved into storage in sufficient quantity to bring peak holdings to 98 million pounds on September 1, the greatest quantity since 1945. American cheese in storage each month during 1948 was greater than in 1947 and at the seasonal peak exceeded last year's peak holdings by 15 million pounds. Total cheese in storage, while generally below average from January to July, exceeded by 10 million pounds the 1943-47 average first-of-the-month stocks from August to December inclusive. Shell eggs totaled no more than 5.7 million cases (July 1) at any time during 1948. These peak holdings were the second lowest for any year since 1916. Frozen egg holdings on July 1 were 267 million pounds, 20 million pounds below the 1943-47 average July 1 stocks. Frozen poultry stocks were generally below 1947 monthly holdings during 1948. Monthly average holdings of 172 million pounds were 68 million pounds below those reported in 1947.

Meats and Meat Products

Frozen beef in storage was below average during most of 1948. The 161 million pounds reported on February 1 was high for the year. On that date, total beef in storage was 176 million pounds. This compares with 191 million pounds reported at the seasonal peak on April 1, 1947. Frozen pork, above average most of 1948, reached its highest level on March 1. The 434 million pounds held on that date was a record high. The total pork in storage on March 1 of 700 million pounds exceeded the 1943-47 average March stocks by 178 million pounds.
