CROP REPORTING BOARD

STATISTICAL REPORTING SERVICE • U.S. DEPARTMENT OF AGRICULTURE • WASHINGTON, D.C.

INDEX

	<u>Page</u>		<u>Page</u>
Alaska	32	Monthly Marketings	33
Barley	12	Oats	6
Broomcorn	25	Peanuts	26
Corn	4	Popcorn	19
Dry Edible Beans	22	Rice	18
Dry Edible Peas	23	Rye	14
Flaxseed	16	Sorghum Grain	17
Hay	28	Soybeans for Beans	20
Hops	30	Wheat	8
Maple Sirup	31	Wrinkled Seed Peas	24
Marketing Seasons	34		

The farm use, sales and value data shown in this report are for the marketing season or crop year. The value estimates shown should not be confused with cash receipts which relate to the calendar year irrespective of the year of production.

FIELD CROPS

Production, Farm Use, Sales, and Value, by States, 1972-1973

This report is one of a series dealing with farm disposition of major farm products, and presents data for 1972 and 1973 specified commodities. It shows estimated production sales (sold or to be sold), use (used or to be used for designated purposes on farms where grown), price, and value. Production shown for each commodity is that published in the 1973 Annual Crop Production Summary.

Estimates of farm use and sales relate to the disposition of a given year's production within the marketing season shown regardless of time of actual disposition. Quantities going into Government resale programs at the end of a current marketing year are included in sales. Therefore, resale grains stored on farms are included in the disposition during the marketing season for the year of production.

Estimates of quantities fed to livestock and poultry represent the portion of production fed on farms where produced. These estimates do not represent total quantities used for livestock and poultry feed. Some of the amounts shown as "sold" are used for feed and seed on other farms.

Total seed requirements are shown for certain crops, and a further breakdown made to show the amount of homegrown seed. The difference between total seed and homegrown seed would thus represent purchased seed, which is included in the total quantity sold.

Sales of some commodities are estimated directly from an analysis of survey data in which farmers report production and sales. For others, special disposition surveys are made in which farmers report their production of each commodity as well as the quantities used on their farms for each purpose. When possible, sales have been checked by enumerations, such as reports of processors, or by records of handlings and shipments by rail, truck, and boat. The entire production is considered sold for commodities with virtually no farm use.

Mid-month prices are used for computing season average prices for most crops included in this report. The mid-month prices are weighted by the estimated percent sold each month in computing State season average prices. Mid-month prices are not available for broomcorn, hops, maple sirup, and popcorn. For these crops, special survey data are used as the basis for season average prices. The State and United States season average prices for barley, dry beans, corn, flaxseed, oats, rice, rye, sorghum grain, soybeans, and wheat include an allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States. The United States season average price shown for each crop is computed by dividing the U. S. value of sales by quantity sold. A United States season average price weighted by production can be derived by dividing the U. S. value of production by quantity produced.

The season average prices for quantities sold are also used to evaluate total quantities produced, and quantities used on farms. Value of sales is computed by applying the unit price to quantity sold during the marketing year. In like manner, value of production are computed by applying the season average price to the quantities produced or used.

Season average prices and value of production including support payments are also shown for corn, wheat, barley and sorghum grain. The United States season average price plus support payments is computed by dividing the U. S. value of production plus support payments by production.

The U. S. monthly open market farm sales as a percent of the marketing year sales for selected crops are shown on page 33. The marketing season for each crop is shown on page 34.

CORN FOR GRAIN: Production, farm use, sales and value, 1972 crop
