## Direct Hay Weighted Average Report for week ending 8/15/2025

Compared to two weeks ago, comparable offerings of small squares, round bales, dehy pellets and ground and delivered hay sold steady. Demand was light. High humidity, rain showers have produced quite a lot of poor-quality hay this summer. Agriculture people really hate to complain about all the rain, but hay producers would sure like a week of sunshine and warm weather without rain to get some good or better-quality hay produced. There will be several thousand tons utility to fair quality alfalfa hay wrapped in bales this season. Per the drought monitor only some spots in the state are showing abnormally dry conditions. Most of the state is in pretty good condition for moisture due to all the blessings from good ole Mother Nature since May.

Alfalfa guidelines (for domestic livestock use and not more than 10% grass)
