# Tobacco Situation and Outlook Yearbook

Thomas C. Capehart

## Abstract

As of the January *Crop Production Annual Report*, total tobacco acreage for the 2006 marketing year was estimated to have slipped 27 percent from 2005 to 298,020 acres. Yields fell 78 pounds per acre overall, reaching 2,147 pounds per acre for all types of tobacco, compared with 2,161 in 2005. Production of all types is estimated at 639.7 million pounds, about 242.3 million pounds below last season. Based on January 2006 estimates, 91 percent of U.S. leaf were types used for cigarettes, compared with 93 percent last season. There will be no marketing quota or price support for 2006 and subsequent crops of tobacco.

Cigarette consumption in 2005 is estimated at 378 billion pieces, compared with 388 billion in 2004, a 2.6-percent slip. Taxable removals for 2005, projected using partial year data, are estimated at 357.7 billion cigarettes, compared with 2004's yearend total of 375.0 billion. Output of cigarettes in the United States is projected at 481.9 billion, 2 percent below the previous year.

## Summary

---

As of January 2006, total tobacco acreage for the 2005 marketing year was estimated to have slipped 27 percent from 2004 to 298,020 acres, about 100,000 acres below last season. Yields slipped 78 pounds per acre overall, reaching 2,147 pounds per acre for all types of tobacco, compared with 2,161 in 2004. Overall, weather conditions were excellent although some flue-cured areas experienced heavy early rains while burley areas were dry. Production of all types is estimated at 639.7 million pounds, about 242.3 million pounds below last season.

Based on January 2006 estimates, 91 percent of U.S. leaf were types used for cigarettes, 2-percent below last season. Cigar leaf, also used for other products such as chewing and smoking tobacco, accounted for 1 percent of production. Other types, mostly dark air- and fire-cured leaf, accounted for 8 percent of production.

There will be no marketing quota or price support for the 2005 and subsequent crops of tobacco. On October 22, 2004, President Bush signed into law the “American Jobs Creation Act of 2004” which contains Title VI, titled Fair and Equitable Tobacco Reform, also known as the “tobacco quota buyout.” Both tobacco quota owners and producers are being compensated for the changes brought about by the termination of the program. Assessments levied on manufacturers and importers of tobacco products provide the funds for the buyout.

Unmanufactured tobacco exports slipped 11 percent during January-September 2005. Shipments were 223.7 million pounds (declared weight) compared with 252.2 million pounds during the same period in 2004. Value declined 8 percent, ending at \$666 million. Flue-cured volume lost 34 percent and burley increased 14 percent. Shipments of fire-cured leaf advanced. Exports of Maryland (type 32), stems, other leaf and cigar wrapper and binder all declined. U.S. burley continues to be the most competitive U.S. tobacco on the world market. More competitive prices in 2005 are likely to result in increased shipments during 2006.

Unmanufactured tobacco imports (consumption) for January-September 2005 declined 13 percent, reaching 365.9 million pounds (declared weight). Last year, January–September import volume declined 7 percent and year-end imports were down 12 percent. General imports advanced 21 percent, more than recouping the 17-percent lost during the 9-month period last year. General imports ended at 421.4 million pounds for the January-September period. Stocks of imported cigarette leaf were 3 percent lower on October 1, 2005, compared with a year earlier at 693.9 million pounds (farm-sales weight).

U.S.-cigarette output in 2004 was 492.8 billion cigarettes, down 1 percent from 2003. For 2005, expected output is about 490 billion pieces also, a 1-percent drop. Domestic consumption in 2004 slid 3 percent to 388 billion cigarettes. Consumption in 2005 is expected to shrink 3 percent again, to reach 375 billion pieces. During the first 9 months of 2005, 83.9 billion cigarettes were shipped overseas, compared with 94.2 billion during the 9-month period in 2004. Yearend shipments are expected to be close to last year’s at about 110 billion cigarettes. The export market for cigarettes is expected to continue at this level for a few years. During January-September 2005, cigarette imports slipped to 13.9 billion pieces, compared with 17.0 billion pieces during the same 9-month period last year.

Cigarette imports are competing with increased production of lower-priced cigarettes in the United States.

## Tobacco Products

### *U.S. Cigarette Consumption in 2005 Estimated at 378 Billion Pieces*

Cigarette consumption in 2005 is estimated at 378 billion pieces, compared with 388 billion in 2004, a 2.6-percent slip. Taxable removals for 2005, projected using partial year data, are estimated at 357.7 billion cigarettes, compared with 2004's yearend total of 375.0 billion. Output of cigarettes in the United States is projected at 481.9 billion, 2 percent below the previous year.

### *CPI for Cigarettes Advances*

The Bureau of Labor Statistics cigarette Consumer Price Index (CPI) increased by 11.1 points from November 2004 to November 2005. Ten States increased cigarette excise taxes effective during 2005, ranging from increases of 25 cents per pack for North Carolina to 100.5 cents for Minnesota. Three States had excise tax increases of \$1.00 per pack or more. Rhode Island changed its tax to an ad valorem tax which is applied to the retail price. Currently, 18 States have cigarette excise taxes exceeding \$1.00 per pack, and four States have taxes exceeding \$2.00.

Wholesale cigarette prices have been unchanged since April 2002. Currently, the wholesale price for premium cigarettes is \$138.20 per thousand (\$2.76 per pack), including Federal excise tax and \$118.70 per thousand (\$2.37 per pack) without Federal excise tax. However, manufacturers have adjusted discounts and promotions on cigarettes sold through selected venues. This affects the price wholesalers pay for cigarettes, although there has been no wholesale price change. The Federal excise tax has been 39 cents per pack since January 1, 2002.

### *Cigarette Trade*

During the first 9 months of 2005, 83.9 billion cigarettes were exported from the United States. For the same period in 2004, exports reached 94.2 billion cigarettes. Total 2004 exports were 118.7 billion cigarettes compared with 121.5 billion in 2003. Exports during 2005 are expected to be around 110 billion cigarettes. To date this year, Japan, Iran, Saudi Arabia, Israel, and Lebanon have been the major markets for U.S. cigarettes, the same ranking as last year. Japan took 72 percent of U.S. shipments, a greater share than during the same period last year.

During January-September 2005, cigarette imports were 83 percent of last year's level. Imports have been declining by a few billion cigarettes annually and are expected to level off at slightly below 20 billion pieces.

### *Large Cigar Consumption Edges Downward, Exports Advance*

Cigar output in 2004 totaled 4,407 million pieces. For 2005, output is expected to decline. Based on 6 months of data, yearend output is projected at 3,950 million large cigars (weighing more than 3 pounds per 1,000 cigars). Taxable removals for 2004 were 4,319 million cigars and are expected to fall about 3 percent in 2005 to reach 4,200 million cigars. Consumption in 2004 was 4,935 million cigars. In 2005, consumption is projected down about 100,000 cigars to 4,830 million cigars. January-September 2005 shipments of cigars overseas reached 427 million cigars, compared with 139 million during the same period last year. If this pace continues, yearend exports could exceed 257 million. Argentina led imports with 168 million cigars (39 percent of total shipments), after taking only 1 million cigars in 2004. Canada, the Netherlands, Croatia, and Norway followed in declining order.

Cigar imports during January-September 2005 slipped 23 percent compared with the same period last year. Yearend imports are expected to be around 450 million cigars. The Dominican Republic, Honduras, India, Nicaragua, and the Netherlands are the main sources for cigars, accounting for 96 percent of U.S. imports.

Small cigar (those weighing less than 3 pounds per 1,000 cigars) production in 2004 was 3,360 million pieces, up 28 percent from 2003. Taxable removals of small cigars reached 2,578 million during the same period, an increase of 17 percent. Exports for 2004 reached 179 million cigars. Imports of small cigars reached 215.4 million during 2004.

Based on 6 months of data, small cigar output in 2005 is projected at 4,600 million, while taxable removals are expected at about 3,600 million. January-September 2005 exports have declined by half, while imports have slipped by about 12 percent. However, yearend exports are expected to regain lost ground and end at about 150 million cigars. New Zealand, Macao, Slovakia, and Bulgaria are major markets for small cigars.

### ***Other Tobacco Products***

Output of chewing tobacco during January-September 2005 reached 30.2 million pounds, unchanged from the previous year. January-September output fell for all classes of chewing tobacco, (firm, moist, twist, and leaf), with the greatest decline in firm and moist plug chewing. Estimated chewing tobacco output for calendar 2006 is 39.2 million pounds. Taxable removals (domestic invoices) of chewing tobacco through September slipped 2 percent, less than during the same period in 2004. Total taxable removals for 2005 are projected at 37.3 million pounds compared with 37.9 million in 2004. As with other smokeless and smoking tobaccos, taxable removals are very close to actual consumption.

After three successive years of robust gains, smoking tobacco output is expected to slip about 11 percent in 2005, based on 9 months of data. Total output for 2005 is projected at 15.8 million pounds, 2 million below 2004. Cut smoking tobacco (used for roll-your-own cigarettes) output declined 11 percent during the January-September period. Through September, 13.0 million pounds of smoking tobacco were manufactured compared with 13.5 million pounds the previous year. January-September taxable removals of smoking tobacco slipped 4 percent this year. Pipe tobacco taxable removals declined and cut tobacco increased.

Snuff continues as a reliable growth sector. During the first three-quarters of 2005 it advanced 12 percent, ending at 66.4 million pounds for the 9-month period compared with 59.5 million during the same period last year. Yearend output is expected to be about 86.5 million pounds. Taxable removals for January-September also advanced 2 percent compared with a year earlier--totaling 59.6 million pounds. Yearend taxable removals are projected at 79.0 million pounds.

## U.S. Exports and Imports

### *Leaf Exports Slide 11 Percent in 2005*

Unmanufactured tobacco exports fell 11 percent during the first 9 months of 2005 compared with the same period a year earlier. Volume reached 223.7 million pounds (declared weight). Value slipped 8 percent to \$665.8 million. Last year, during the same period, 252.1 million pounds were shipped, and exports were 236 million pounds during the same period in 2003. Burley shipments continued their upward trend, gaining 14 percent. The only other category to gain was fire-cured, which advanced 10 percent. Flue-cured, Maryland, cigar binder, wrapper, other leaf, stems, and refuse all declined in volume. Calendar year exports are projected to decline by close to 10 percent by yearend to approach 350 million pounds.

January-September 2005 exports of flue-cured leaf totaled 61 million pounds, about a third less than last year. Shipments slipped by 31 million pounds. Top destinations were Japan, Germany South Korea, Belgium, Taiwan, and Indonesia. Together, these six countries purchased more than 38 million pounds during the 9-month period and accounted for 63 percent of shipments by volume. Forty-three countries bought U.S. flue-cured during the three-quarter period. In 2004, China purchased 6.1 million pounds, the third largest for the January-September period, but in 2005, its purchases were only 131,000 pounds.

Burley leaf export gains were spread among fewer countries, but purchases were not as concentrated as flue-cured. Burley shipments have been gaining as a component of total leaf exports, accounting for just over half of total export volume during the January-September period, compared with 41 percent last year and 36 percent the year before. Global demand for burley continues to exceed supplies, especially for high-quality leaf.

Figure 3

#### **Export markets for U.S. tobacco**

Million pounds

Unmanufactured, declared weight, European Union (EU-25, formerly referred to as the European Community, EC, or EC-12).

Source: Bureau of the Census.

After gaining during the January-September period in 2004, Maryland leaf exports slipped by a third during the 9-month period in 2005. Shipments were 800,000 pounds, compared with 1.2 million in 2004. Shipments of Kentucky-Tennessee dark fire-cured advanced, reaching 5.6 million pounds. During the same period last year, shipments were 5.1 million, down from 2003's 6.7 million pounds. The Netherlands, Sri Lanka, Italy, and Nigeria were the top buyers of Kentucky-Tennessee fire-cured leaf. Connecticut wrapper shipments declined by 13 percent. Blackfat shipments remained at very low levels. Cigar binder, stems, and "other tobacco" all declined.

Among major markets, volume to the European Union-25 (EU-25) slipped 9 percent to 103.9 million pounds during January-September 2005, accounting for 46 percent of export volume, slightly less than last year. Germany and Belgium sharply reduced purchases from the United States, and the Netherlands boosted its imports. Japan and Germany each purchased 26.5 million pounds, and Belgium followed with 12.2 million pounds. The Netherlands took 11.8 million pounds. Japan and Germany accounted for 24 percent of shipments. Russia, Belgium, France, Lithuania, Switzerland, and Indonesia were the next largest buyers, accounting for an additional 30 percent of U.S. leaf exports. There have been no exports under U.S. Department of Agriculture (USDA)-financed programs since 1993.

### ***Imports for Consumption Down 7 Percent***

Unmanufactured tobacco imports (consumption) for January-September 2005 were 366 million pounds, compared with 422 million pounds during the 9-month period in 2004. Yearend imports for 2005 are expected to approach 475 million pounds.

During January-September 2005, Oriental leaf imports slipped 19 percent to 80 million pounds compared with 99 million pounds during the same period the previous year. Stemmed flue-cured imports plummeted 28 percent to 78 million pounds during the 9-month period. Imports of stemmed "not specifically provided for" leaf (mostly burley) fell 4 percent to 80 million pounds. Cigar leaf shipments slipped 8 percent. Imports of stems reversed a downward trend and advanced 19 percent to 69 million pounds.

General imports of unmanufactured tobacco gained 21 percent during January-September 2005, reaching 421 million pounds, compared with 349 million pounds last year. General imports of Oriental leaf fell 14 percent to 77 million pounds. Stemmed flue-cured declined 11 percent to 85 million pounds. But stemmed burley leaf imports (as indicated by the "not specifically provided for" category which is mostly burley) doubled, reaching 111 million pounds for the 9-month period. General imports of stems also made significant gains, with the 9-month total at twice the same period in 2004 at 86 million pounds. January-September 2005 cigar wrapper shipments advanced .9 million pounds to 2.9 million pounds. Cigar filler imports gained 7 percent, reaching 49 million pounds during the same period.

### ***Imported Leaf Stocks***

Stocks of imported cigarette leaf were down 3 percent on October 1, 2005, compared with a year earlier at 694 million pounds. Oriental and flue-cured leaf

stocks each fell by more than 40 percent, ending at 115 and 159 million pounds, respectively. Burley leaf stocks slipped 3 percent to 230 million pounds. Cigarette leaf stocks have stabilized at lower than traditional levels. During the last half of 2005, total cigar tobacco stocks are at the lowest level since the mid-1990s. As of October 1, total cigar stocks were 88.6 million pounds.

### ***Tariff-Rate Quota***

The tobacco tariff-rate quota (TRQ) year begins on September 13 and runs through September 12 the following year. The TRQ for 2005-06 on cigarette tobacco leaf imports (excluding Oriental) was 23 percent filled (105.2 million pounds) as of January 3, 2006. The total quantity allowed under the TRQ is 332.2 million pounds.

## U.S. Tobacco Leaf Situation and Outlook <sup>1</sup>

---

Based on October 1 estimates, tobacco acreage for the 2005 marketing year slipped 27 percent to 298,020 acres, compared with 408,050 acres in 2004. Yields slipped, reaching 2,147 pounds per acre for all types of tobacco, compared with the 2,161-pound yield of 2004. Yields were still higher than 2002-2003 levels, but did not reach the levels found in 2000 and 2001. Production of all types is estimated at 639.7 million pounds, about 240.0 million pounds below last season. During the first post-program season, many producers have exited the industry. Ninety-one percent of U.S. leaf produced was used for cigarettes. Cigar leaf, also used for other products such as chewing and smoking tobacco, accounted for 1 percent of production. Other types, mostly dark air- and fire-cured leaf, accounted for 8 percent of production.

<sup>1</sup> All quantities in this section are in farm sales weight unless otherwise noted. Years refer to marketing years; July-June for flue-cured and cigar wrapped (type 61) and October-September for all other types, unless otherwise noted.

## **Flue-Cured Tobacco**

---

Flue-cured production for 2005 is estimated at 383.5 million pounds as of January 2006, 26 percent below 2004's 521.5 million. Yields declined slightly, but the nearly 50,000-drop in acres caused dramatic reductions in production. Flue-cured acreage was 175,500 acres this season compared with 228,400 in 2004. In the Old Belt, acreage plummeted nearly 40 percent. Many producers in the Old Belt have smaller operations and are not as competitive as those in the Coastal Plains. Declines in other areas ranged from 20 to 30 percent.

Last season, final flue-cured sales were held November 10, 2004. Producers' sales totaled 499.3 million pounds, close to the effective quota for 2004. The overall price was \$184.40 per hundredweight (cwt) on gross sales of 500.6 million pounds. For 2004, auction sales accounted for 26 percent of total gross sales.

### ***Flue-Cured Supplies Slip in 2005***

For the 2005/06 crop year, flue-cured supplies are estimated at 1,179 million pounds, 11 percent below last year's 1,322 million pounds. Stocks were 3 percent lower and marketings are projected down by 114.9 million pounds. Total disappearance for 2005 is projected at 504.5 million pounds, 21.7 million pounds below 2004. Domestic disappearance advanced while exports declined. Ending stocks in 2005 are expected to be around 675 million pounds.

Figure 4

# **Flue-cured tobacco: Supply, price, and use**

Trade stocks include those of manufacturers and dealers.  
Source: Agricultural Marketing Service, USDA.

## Burley Tobacco

---

As of January 2006, burley acreage for 2005 is projected at 100,100 acres, about 50,000 acres fewer than in 2004. Yields declined 44 pounds per acre, resulting in production of 195.4 million pounds, about 100 million pounds below last season. Production declined 44 percent in Virginia, 35 percent in Kentucky, and 30 percent in Tennessee. Many, in some areas over half of the producers, have left burley production since the buyout.

### *Disappearance Increases in 2004*

During the 2004 crop year, which ended October 1, 2005, burley disappearance grew. Both domestic use and exports advanced, resulting in total use of 397.2 million pounds, 87.3 million pounds higher than 2003. Domestic use increased 25 percent and foreign use by 31 percent.

For 2005, domestic use is expected to remain steady and exports to increase by about 10 million pounds. Total use is expected to be about 360 million pounds. Globally, there is a shortage of burley leaf, which has boosted demand.

Figure 5

Cents/lb

Million lb

## Southern Maryland

---

Although Maryland type 32 producers were not part of the quota buyout, Maryland acreage has declined considerably this season. Now that there is no tobacco program, producers are free to plant burley in Maryland and Pennsylvania, and many have done so. Acreage of Maryland leaf in Pennsylvania is projected at 1,500 acres, 700 acres below last season. Data for the State of Maryland are no longer collected. Production in Pennsylvania is expected to reach 3.0 million pounds, compared with 4.0 million last season. Last season, total (Maryland and Pennsylvania) production was 5.8 million pounds.

During the year ending September 30, 2005 (crop year 2004), disappearance of Maryland tobacco is estimated at 6.5 million pounds, compared with 6.4 million pounds during 2003-04. Exports fell by about 500,000 pounds, and domestic use increased by a similar amount. For all type 32 tobacco, January 1, 2005, stocks were 5.0 million pounds, compared with 7.2 million pounds the previous season. Supplies in 2005 are expected to advance by a third to 7.3 million pounds.

## Fire-Cured

---

Fire-cured (types 21-23) production in 2005 is estimated at 37.6 million pounds, compared with 37.2 million pounds the previous season. Beginning in 2005, acreage and production data for types 22 and 23 will be aggregated. Data for type 21 (Virginia fire-cured) will still be available separately. Acreage for fire-cured leaf increased 9 percent overall. Kentucky acreage advanced 13 percent, Tennessee fell by 40 percent, and Virginia fire-cured acreage fell by half. Yields in Tennessee and Virginia slipped, adding to the decline in production.

### *Disappearance in 2004*

Disappearance of fire-cured (types 21-23) slipped 2.8 million pounds to 30.9 million pounds during the 2004-2005 season (ending October 1, 2005). Snuff production has increased, but declines in chewing tobacco output dampened demand for fire-cured tobacco in the domestic market. Domestic use advanced 1.6 million pounds to 22.2 million, and exports fell 4.4 million pounds to 8.8 million. The Netherlands, Sri Lanka, Italy, Belgium, and Nigeria were major destinations for fire-cured leaf.

## Dark-Air Cured

---

January 2006 estimates indicate 2005 dark air-cured (types 35-36) tobacco production will decline by 2 percent to reach 11.5 million pounds. As with fire-cured, data for types 35 and 36 are now aggregated. Last year, production was 11.8 million pounds. Acreage this season declined 4 percent to 4,040 acres. Slightly higher beginning stocks combined with lower production resulted in a projected 1-percent decline in supply to 48.9 million pounds for 2005.

Disappearance in 2004 (marketing year ending on October 1, 2005) slipped 3 percent to 11.5 million pounds. Domestic use advanced. Resulting beginning stocks on October 1, 2005, were 37.5 million pounds, a quarter-million pounds greater than the previous October. With production at 11.3 million pounds, supplies in 2005 are expected to be about 300,000 pounds short of last season's at about 48.8 million pounds.

Virginia sun-cured (type 37) is not being produced this season. Supply for 2005 consists of beginning stocks of 49,000 pounds. Disappearance during the 2004 crop year was 182,000 pounds, all of which went to domestic use. During the 2003 crop year, disappearance was less than half that in 2004.

## Cigar Tobacco Production Slips

---

January 2006 estimates project U.S. cigar tobacco acreage will fall by nearly 9 percent to 4,930 acres for the 2005 marketing year, not including Wisconsin binder leaf. Beginning in 2005 data are no longer available for Wisconsin binder although Southern Wisconsin binder (type 55) is being produced. Cigar leaf production is set at only 8.7 million pounds, a decline of 11 percent. Accounting for Wisconsin binder in 2004, production results in a 35-percent decline for 2005. For 2005, with beginning stocks of 20.2 million pounds, resulting supplies for 2005 are 28.9 million pounds.

Cigar leaf disappearance slipped during the 2004-2005 marketing season (July-June for cigar wrapper leaf and October-September for other cigar types). Disappearance of 13.4 million pounds was 13-percent lower than the previous season's 15.4 million pounds. Exports slipped to 1.8 million pounds, while domestic use slid just under a million pounds to 11.6 million.

Disappearance of Pennsylvania filler during 2004 fell to 4.0 million pounds after reaching 6.2 million pounds in 2003. Exports were negligible. In the past, many growers of Pennsylvania filler tobacco often grew Maryland type 32. Beginning in 2005, they are able to grow other types, and many growers have begun producing burley.

As of January 2006, Connecticut Valley binder (type 51) production for 2005 is estimated at 4.1 million pounds compared with 3.8 million in 2004. Yields are expected to improve this season, as the increased production is based on virtually the same acreage.

The January 2006 crop production estimate sets wrapper leaf production at 1.8 million pounds compared with 1.9 million last season. Acreage is up by 50 acres to reach 1,230. With beginning stocks at .6 million pounds, supplies of cigar wrapper leaf should be 2.4 million pounds in 2005, up 200,000 pounds from the previous season.

For the 2004 season (July 2004-June 2005), wrapper disappearance advanced slightly to 1.6 million pounds compared with the previous season. Domestic use fell, and exports increased slightly.

9. U.S. exports of unmanufactured tobacco by types and to principal importing countries, 2000-05 (declared weight) .....	25
10. U.S. tobacco: Acreage and yield, 2002-05 .....	26
11. Lease and transfer of allotments and quotas, 1979-2004 .....	26
12. Flue-cured and burley tobacco: Marketing quota and marketings, 1973-2004 .....	27
13. Flue-cured tobacco: Gross sales (including resales), average prices, and loan receipts by belt, 1995-2004 .....	28
14. Flue-cured tobacco: Percentage distribution of marketings by group and quality, 1994-2004 crops .....	29
15. U.S. flue-cured exports to principal countries, 2001-05 (export weight) .....	30
16. Flue-cured tobacco (types 11-14): Acreage, yield, marketings, stocks, supply, disappearance, and price, United States, 1950-2005 .....	31
17. Burley tobacco (type 31): Acreage, yield, marketings, stocks, supply, disappearance, and price, United States, 1950-2005 .....	32
18. Flue-cured and burley tobacco: Stocks and stock utilization ratios, manufacturers and dealers, 1994-2005 (farm-sales weight) .....	33
19. Flue-cured tobacco: Production in specified countries, 1996-2003 .....	33
20. Tobacco loan stocks, 2002-05 (farm-sales weight) .....	34
21. Burley tobacco: Gross sales, average price, and percentage sold before and after the Christmas holidays, 1982-2005 .....	34
22. Maryland tobacco (type 31): Acreage, yield, production, stocks, supply, disappearance, and price, United States, 1950-2005 .....	35

23. Fire-cured tobacco, Kentucky-Tennessee types 22-23: Acreage, yield, marketings, stocks, supply, disappearance, and price, United States, 1950-2005 .....	36
24. Virginia fire-cured tobacco, Virginia type 21: Acreage, yield, marketings, stocks, supply, disappearance, and price, United States, 1950-2005 .....	37
25. Air-cured tobacco, Kentucky-Tennessee types 35-36: Acreage, yield, marketings, stocks, supply, disappearance, and price, United States, 1950-2005 .....	38
26. Air-cured tobacco, Virginia type 37: Acreage, yield, marketings, stocks, supply, disappearance, and price, United States, 1950-2005 .....	39
27. Cigar tobacco, type 41-61: Domestic supplies, disappearance, and season average prices, 1995-2005 (farm-sales weight) .....	40
28. Tobacco: Acreage, yield, production, stocks, supply, disappearance, price and crop value, United States, 1955-2005 (farm-sales weight) .....	42
29. U.S. exports of unmanufactured tobacco by types, to principal importing countries, crop years 2002/03-2004/05 (declared weight) .....	43
30. U.S. and world production and exports of flue-cured, burley, and all unmanufactured tobacco, 1955-2004 .....	44
31. Cash receipts from tobacco as a percentage of cash receipts from crops and from all farm commodities, by States, 2002-04 .....	46
32. U.S. stocks of foreign-grown flue-cured leaf, by quarter, 1971-2005 .....	47
33. U.S. stocks of foreign-grown burley leaf, by quarter, 1971-2005 .....	48
34. U.S. stocks of foreign-grown Oriental leaf, by quarter, 1971-2005 .....	49
35. U.S. stocks of foreign-grown cigarette leaf, by quarter, 1971-2005 .....	50
36. U.S. stocks of foreign-grown cigar leaf, by quarter, 1955-2005 .....	51
37. Wholesale premium brand cigarette prices revisions, 1990-2002 .....	52

1/ Marketing year beginning October 1. 2/ Actual marketings in the marketing year. For 2005, estimated marketings. 3/ Exports compiled from publications and records of the Bureau of the Census. 4/ Adjusted for change in conversion factor January 1, 1977. 5/ Stocks revision January 1, 1979, report. 6/ The factor used to convert stemmed stocks to farm sales weight has been changed from 1.55 to 1.6 based on processing yields from 1989 to 1992.

7/ Domestic disappearance includes forgiven 1999 loan takings of 230 mil. pounds. 8/ Subject to revision. October 1 crop estimate. 9/ Price not available.

Sources: Agricultural Marketing Service, National Agricultural Statistics Service, and Farm Service Agency, USDA.
