Noncitrus Fruits and Nuts

1993 Summary

Utilized Production Down 3 Percent, Value Up 2 Percent

The Nation's utilized production of the leading noncitrus fruit crops totaled 16.6 million tons in 1993, down 3 percent from 1992. Strawberries are now included in the noncitrus fruit production for these calculations. Larger crops of apples, berries, dates, figs, guavas, peaches, pears, and strawberries were produced. Utilized production decreased for apricots, avocados, bananas, sweet and tart cherries, cranberries, grapes, kiwifruit, nectarines, olives, papayas, pineapples, California plums, California prunes, and other prunes and plums.

Value of utilized production for noncitrus fruit crops totaled \$6.17 billion, up 2 percent from 1992. Prices were available for all fruit crops at this time except cranberries. Value estimates for cranberries will be available August 16, 1994. In order to estimate a value, cranberry season average prices for 1992 were used, multiplied by 1993 production.

Decreased value for apples, bananas, berries, tart cherries, olives, papayas, pears, pineapple, California prunes, and other prunes and plums were offset by increased value in the other crops. Price increases for papayas, pineapples, and California prunes could not offset decreases in utilized production. Increased utilized production was able to offset price decreases for dates and guava.

Nut Production Increases 13 Percent, Value Up 21 Percent

The 1993 U.S. nut production increased 13 percent to 982,000 tons. Larger crops of hazelnuts, macadamias, pecans, pistachios, and walnuts were produced. Utilized production was lower for almonds. The hazelnut, pecan, pistachio, and walnut crops were the largest ever produced in the U.S.

The 1993 value of utilized production for the six crops totaled \$1.71 billion, up 21 percent from last year. Values were higher for almonds, hazelnuts, macadamias, pistachios, and walnuts. Much lower prices offset higher production for pecans.

Noncitrus Fruits and Nuts: Bearing Acreage and Yield per Acre
by Type, United States, 1991-93

Crop	Bearing Acreage <u>1/</u>			Yield per Acre <u>2/</u>

Total	661,970	664,930	676,130	--	--	--

- 1/ Bearing acreage estimates are primarily based on periodic orchard and vineyard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys, and other indications.
- 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions.
- 3/ U.S. estimates not available prior to 1992.
- 4/ Yields not calculated because only utilized production is estimated.
- 5/ In 1993, 20,000 acres of raisin grapes were enrolled in the CA Raisin Industry Diversion program (RID). These acres were deducted from bearing acres for yield calculations. There were 12,500 acres in 1992 and 20,000 acres in 1991.
- 6/ Pineapple acreage is total acres in crop, not harvested acreage. Pineapple yields are not estimated.
- 7/ ID, MI, OR, and WA.
- 8/ Nut yields are based on utilized production, not total production.

1/ Data not published for some States to avoid disclosure of individual operations.

2/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.

3/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions.

4/ No significant commercial production in 1991 due to frost damage.

1/ Cranberries paid for by processors and lost because of dehydration and berry breakdown after delivery.

2/ Weighted average of co-op and independent sales. Co-op prices represent pool proceeds excluding returns from non-cranberry products and before any deductions for capital stock and other retains.

3/ Estimates for 1993 will be published on August 16, 1994.

- 1/ Bearing acreage estimates are primarily based on periodic vineyard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.
- 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.
- 3/ In 1993, 20,000 acres of raisin grapes were enrolled in the CA Raisin Industry Diversion program (RID). There were 12,500 acres in RID in 1992 and 20,000 acres in 1991. These acres have been deducted from bearing acres for yield calculations.

1/ Data not published for some States to avoid disclosure of individual operations.

2/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.

3/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.

4/ Processed mostly canned but includes small quantities dried and other uses not published separately to avoid disclosure of individual operations.

- 1/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.
- 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.
- 3/ Data not published for some States to avoid disclosure of individual operations.
- 4/ Processed mostly canned but includes small quantities dried and other uses not published separately to avoid disclosure of individual operations.
- 5/ Processed mostly juice, but includes small quantities canned and other uses not published separately to avoid disclosure of individual operations.

2/ Estimates for Kansas are published separately beginning in 1993.

3/ AZ, KS, MO and TN in 1991 and 1992. AZ, MO, and TN in 1993. No breakdown between varieties.

Definitions of Terms

Total Production - is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic or natural reasons.

Utilized Production - is the amount sold plus the quantities used at home or held in storage.

Unutilized Production - is the difference between total and utilized production which is fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized.

Utilization - refers to first utilization, not necessarily final utilization. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Apples, Commercial Crop - orchards of 100 or more bearing age trees.

Prices - are a marketing year average for all methods of sale. For a crop sold for both fresh market and processing, the **marketing year average price (MYAP)** is a weighted average of the fresh and processing price.

Prices for fresh fruit are the average prices producers receive at the point of first sale. This is commonly referred to as the **average price as sold**. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold f.o.b. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit **average price as sold** is a weighted average of the average price for each method of sale. The exception is fresh fruit sales in California, Washington, New York (apples only), and Oregon (except peaches) which are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices.

F.o.b. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the f.o.b. price. These costs include grading, packing, inspection fees, marketing, and other costs.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for California olives and clingstone peaches which are priced at the first delivery point.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops which are on a

calendar year. The following procedure is used to compute State values for all commodity groups:

State Value Computation Procedure

Fresh Market Value = Fresh Market MYAP x Fresh Market Utilization
Process Market Value = Process Market MYAP x Process Market Utilization
"All" Sales Value = Fresh Market Value + Process Market Value
"All" Sales MYAP = "All" Sales Value Divided By
"All" Sales Utilization

For commodities with components not identified by market channel, substitute *breakdown name for fresh/processing market* and use the same procedure. The procedure used for computation of U.S. Marketing Year Average Prices follows:

U.S. MYAP Computation Procedure

Fresh Market MYAP = Fresh Market Value For All States Divided By
Fresh Market Utilization For All States
Process Market MYAP = Process Market Value For All States Divided By
Process Market Utilization For All States
"All" Sales MYAP = Sales Value For All States Divided By
Sales Utilization For All States

Fruits (Noncitrus): Marketing Seasons for Specified Crops ^{1/}

Apples:	All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California. June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 to July 31.
Apricots:	Fresh Fruit -- May 25 to August 20. Canning -- June 15 to August 15. Dried -- California, June 20 to August 20.
Avocados:	California -- November 1 to November 30 (following year). Florida -- June 20 to Feb 28.
Bananas:	January 1 to December 31.
Cherries:	Fresh Fruit -- Sweet varieties, May 1 to August 15; Tart varieties, June 15 to August 20.
Cranberries:	September 5 to December 20.
Dates:	August 15 to March 15.
Figs:	Fresh Fruit -- June 5 to October 15. Canning -- August 1 to October 15. Dried -- California, June 20 to October 31.
Grapes:	Fresh Fruit -- California, May 25 to April 30; Arizona, June 5 to July 15; All other States, July 10 to October 31. Crushed for Juice, Wine and Brandy -- August 1 to December 15. Dried for Raisins -- California, September 1 to May 30.
Kiwifruit:	November 1 to April 30.
Nectarines:	June 10 to August 31.
Olives:	September 25 to March 15.
Papayas:	January 1 to December 31. (Peak harvest May 15 to July 15 and September 15 to December 15).

^{1/} See footnote on page 71.

Fruits (Noncitrus): Marketing Seasons for Specified Crops--continued 1/

Peaches: **Fresh Fruit** -- Georgia and South Carolina, May 20 to August 31; Other South Atlantic States, South Central States, and California, June 1 to September 30; New England States, New York, Michigan, and Idaho, August 1 to September 30; all other States, July 1 to September 30.

Canning -- California, July 1 to September 10.

Dried -- California, August 1 to October 10.

Pears: **Fresh Fruit** -- California, July 1 to April 30; Washington and Oregon, August 10 to May 31; Other States, July 1 to December 15.

Canning and Dried -- California, Washington and Oregon, August 1 to November 30.

Pineapples: January 1 to December 31. (Peak harvest March 1 to July 31).

Plums: **Fresh Fruit** -- California, May 25 to September 30.

Canning -- California, June 1 to September 30.

Prunes: **Dried** -- California, August 1 to April 31.

Prunes and Plums: **Fresh Fruit and Canning** -- Idaho, Michigan, Oregon and Washington, August 10 to October 20.

Tree Nuts

Almonds: August 5 to November 15.

Filberts: October 1 to September 30.
(Hazelnuts)

Macadamia Nuts: January 1 to December 31 (Peak harvest August 1 to December 31).

Pecans: September 30 to March 15.

Pistachios: September 1 to October 31.

Walnuts: September 15 to December 30.

1/ For detail by States, see Agricultural Handbook No. 186, **"Fruits and Tree Nuts, Blooming, Harvesting, and Marketing Dates"**, Dec 1975.
